# One person. End to end.

A 22-year-old solo founder plans, designs, builds, and ships in-house. 11 apps are not the end — they are the start of one Newon ecosystem.

**Build wide. Validate fast. Focus deep. Connect what works.**

Separate apps into one Newon ecosystem. Next is focus.

# Life is connected. The services we use are not.

Newon finds repeating problems in daily life, solves them with digital products, then validates and connects what works.

Product & venture studio

# Beyond 11 apps.

The five axes are not equal. Products are the core. Web / Newon+ is infrastructure.

# From finance and health to automation and commerce.

Current features and next steps are separate. This is not a plan to do everything at once.

|                                                                                                                        |                                                                                                                     |                                                                                                                           |

# Revenue structure.

Subscription → Commerce → SaaS / B2B → Platform

The structure can expand Subscription → Commerce → SaaS/B2B → Platform. We separate having a model from having revenue.

|                                                     |                                                                                                           |                                                              |
|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|

From planning to distribution

A large vision. Focused execution.

# We do not do everything at once.

We accelerate focus → validate → connect. It is a company roadmap, not apps only.

| 01 DONE           | 02 NOW                  | 03 NEXT          | 04 LATER               | 05 LATER              |

# Let's Build the Next Newon

FOCUS. VALIDATE. CONNECT.

This is not a round to scale all 11 services at once. It is to choose core products, validate users, retention, and profitability, and build a Newon+ connection layer for one ecosystem.

| Use of Funds · Growth Plan |                                                                                           |
|----------------------------|-------------------------------------------------------------------------------------------|
| 01                         | <div>Product</div> <div>Deepen existing apps and expand the Newon ecosystem</div>         |
| 02                         | <div>Growth</div> <div>Acquire users and grow brand / marketing</div>                     |
