DUE DILIGENCE APPENDIX
2026.11.18

Detailed investment appendix

Each business's features, operating policy, customers, pricing, competition, technology, regulation, financials, development status and risks are organized into 16 items per business for due diligence.

A	**Company · launch history · metrics audit**	
B	**SHAREON**	Sharing & rental
C	**BABYLOG**	Family growth records
D	**PETLOG**	Pet life
E	**ONGIL**	Senior living & care
F	**Technology · organization · incorporation · investment terms · finance**	
G	**Customer validation · partners · due-diligence materials**	

Newon

Contents

Supporting evidence and detailed operating material for the main investment proposal.

A Company · launch history · metrics audit · full development audit · actual-metrics check — **04–09**

B **SHAREON** — ①Definition & vision ②Customers ③Scenarios ④Scope & features ⑤Dev status ⑥Free vs paid ⑦Pricing ⑧Payers & billing ⑨Acquisition ⑩Competition ⑪Market & plan ⑫Unit economics ⑬Security & legal ⑭Schedule ⑮KPIs ⑯Execution — **10–24**

C **BABYLOG** — ①Definition & vision ②Customers ③Scenarios ④Scope & features ⑤Dev status ⑥Free vs paid ⑦Pricing ⑧Payers & billing ⑨Acquisition ⑩Competition ⑪Market & plan ⑫Unit economics ⑬Security & legal ⑭Schedule ⑮KPIs ⑯Execution — **25–37**

D **PETLOG** — ①Definition & vision ②Customers ③Scenarios ④Scope & features ⑤Dev status ⑥Free vs paid ⑦Pricing ⑧Payers & billing ⑨Acquisition ⑩Competition ⑪Market & plan ⑫Unit economics ⑬Security & legal ⑭Schedule ⑮KPIs ⑯Execution — **38–50**

E **ONGIL** — ①Definition & vision ②Customers ③Scenarios ④Scope & features ⑤Dev status ⑥Free vs paid ⑦Pricing ⑧Payers & billing ⑨Acquisition ⑩Competition ⑪Market & plan ⑫Unit economics ⑬Security & legal ⑭Schedule ⑮KPIs ⑯Execution — **51–64**

F Technology · founder workload · hiring & outsourcing · incorporation · investment terms · financial assumptions · cost plan · monthly cash flow (₩300M · ₩200M) · scenarios — **65–74**

G Customer validation · SHAREON partners & infrastructure · domestic OI · overseas OI · OI detail by partner · due-diligence checklist · sources — **75–84**

Each business has 12 pages (SHAREON and ONGIL add 1 page detailing categories / 28 areas), with the 16 required items numbered ①–⑯.

How to read this appendix

Every figure carries an evidence grade. Please read CEO-confirmed results separately from business-plan figures.

Evidence grade

Evidence grade	Meaning	Example in this appendix
Confirmed	Confirmed in repositories, stores and documents	Release date · version · tests passed
CEO-confirmed	Information provided and confirmed directly by the CEO	Launch history · download results · partnership progress · confirmed policy
Planned	Financial model inputs	Transactions · conversion · advertisers · average transaction value
Proposed price	Proposed commercial prices & rates	SHAREON ads · ONGIL pricing · BABYLOG institution SaaS
Measured after launch	Measured after analytics are connected	Active users · retention · conversion

Feature status labels

Status label	Definition
Live	Released in the stores and in use
Built	Verified by code, automated tests and simulator · not released
Partly built	Only some screens and features built
In development	In development — unreleased branch
Planned	Planning done — not currently offered
Long-term	Long-term expansion — not currently offered
Confirmed policy	Prices and rates confirmed · not yet sold or operated
Contract/legal required	External contracts and reviews (PG, ID verification, legal) come first
In progress	In progress
Estimated scenario	Financial model assumptions

16 items per business

① Definition & long-term vision ② Core customers & problems ③ Usage scenarios ④ Business areas & features ⑤ Development & release status by feature ⑥ Free vs paid ⑦ Confirmed fees, subscriptions & ad policy ⑧ Payers & billing timing ⑨ Customer acquisition & business sales ⑩ Competition & differentiation ⑪ Market evidence & outlook ⑫ Unit economics ⑬ Security, legal & regulation ⑭ Monthly schedule ⑮ KPIs & completion criteria ⑯ Execution tasks & responses

Company overview and focus businesses

NEWON is a one-person sole proprietorship; 2 of its 4 businesses are live in the app stores.

Trade name	NEWON (뉴온) · brand Newon
Entity	Sole proprietorship — to convert to a corporation around the investment agreement
Founded	2026-03 (a masked copy of the business registration certificate will be provided in due diligence)
CEO	Nawon Kyung · Founder & CEO · App Developer
Industry	Application software development and supply
Website	newon.app
Team	CEO only (0 full-time employees)
Funding history	No outside investment (self-funded)
Current revenue	Confirmed revenue: 0 — store subscription revenue to be submitted from the consoles in due diligence

Focus businesses and resource allocation

Business	Role	Current status	Use of funds
SHAREON	Top-priority growth business	Not released · Payment OFF · NO-GO	Maximum (launch, payments, marketing)
PETLOG	Subscription + transactions	Live · V2 in development	V2 · CARE
BABYLOG	Family subscription	Live · integrated build NO-GO	Security & family subscription
ONGIL	4th priority	Not launched · paused → restart Jun 2027	Extension development & QA ₩22M (M7–M10) · launch target Oct 2027
LIVON · MY WORLD	Past history	Out of focus	None

Company information: checked against CEO-provided materials and p.8 of the previous IR. Sensitive originals such as the business registration certificate and backup codes were not opened in this work.

Launch history — 11 apps registered in the stores

11 apps: confirmed by re-checking the App Store and Google Play developer pages (2026-11-12). BABYLOG and PETLOG cumulative downloads 600+ (CEO-provided figure).

App	Field	Store status	Category	Notes
BABYLOG	Parenting & family records	Live · App Store 1.0.7	Current focus	329 screens · 12 languages · 2026-06-13
PETLOG	Pet life	Live · App Store 1.0.5	Current focus	12 languages · 2026-06-24
SubPing	Subscription management	Store listing	History	
Savy	Households	Store listing	History	
PillMate	Medication	Store listing	History	
PiggyUp	Savings	Store listing	History	
OX MONTH	Habit	Store listing	History	
My World (MY WORLD)	Travel · records	Store listing	Out of focus · history	
GoalUp	Target	Store listing	History	
CountUp	Counter	Store listing	History	
NEWON	Company apps	Store listing	Company	
SHAREON	Sharing & rental	Not released	Current focus	9 launch gates
ONGIL	Seniors	Not released	Current focus (conditional)	Simulator
LIVON	Living	—	Out of focus · history	History

Building 11 apps became the shared technology base for the four platforms. The investment covers SHAREON, BABYLOG, PETLOG and ONGIL only; the other apps receive no new resources beyond maintenance.

Sources: CEO confirmation (2026-10-21), app list from the previous IR.

Evidence summary — separating CEO-confirmed results from business plans

Item	Sources	Timing	Grade	Notation in this document
BABYLOG and PETLOG live on iOS and Android	Repository & store	2026-10-21	Confirmed	Launch track record
11 apps registered (11 each on App Store and Google Play)	Re-check developer page	2026-11-12	Confirmed	Track record
App Store public version · languages	App Store app page	2026-11-12	Confirmed	BB 1.0.7 (08-17) · PL 1.0.5 (08-26) · 12 languages each
600+ cumulative downloads (BABYLOG & PETLOG)	CEO-provided (store totals)	2026-11	CEO-provided figure	Google Play public range 10+ each · distinct from unique users
Business information	Google Play developer public info	2026-11-12	Confirmed	Sole proprietorship NEWON (business reg. no. 840-48-01205)
Paid subscribers & revenue	Store console	Due-diligence submission	Due-diligence submission	The financial model excludes existing subscription revenue (conservative)
Active users & retention	After analytics are connected	30 days after investment	Measured after launch	Measurement plan
SHAREON national launch Feb–Mar 2027	CEO decision	2026-11-12	Confirmed direction	Launch goal · shown with launch gates
SHAREON P0 & integration status	S24 defect log · S4 register	2026-11-08	Confirmed	Launch gates (A4)
6 P0s in the BABYLOG integrated build	B8 report no. 23	2026-11-10	Confirmed	Launch gates (A4)
PETLOG V2 tests 332/332	Isolated QA on Mac	2026-11-08	Confirmed	V2 release preparation
ONGIL simulator 6/6 · accessibility 24/24	Repository	2026-10-19	Confirmed	Basis for restart
SHAREON: 8 in talks · 5 replied or further	CEO-confirmed · KCB form	2026-11-07	CEO-confirmed	Labeled by stage (G02) · contracts after incorporation
BB ₩9,900 · ₩99,000 · PL prices, CARE rates, ad prices	CEO-confirmed policy	2026-11	Confirmed policy	Confirmed policy

For due diligence we will submit store console screens, partnership emails and product demos.

Development audit ① SHAREON · BABYLOG

Mac repositories and QA logs were re-checked read-only (2026-11-12). All pass counts are internal tests, not independent verification.

SHAREON

Repository · HEAD	S2 official 0ea81b8 · S4 integration candidate 2c96f9b · S25 v1.4 candidate fe47731 · app UI 61494ee
Checked on · version	2026-11-08 · not launched / development build
Automated tests	PostgreSQL 16 full suite 1,208/1,234 · policy 20/20 · S6 29/29 (all internal tests)
P0 / P1	P0 OPEN 4 · dependent P0 2 · candidate P0 1 · P1 FAIL 1 · CLOSED 0 · integration BLOCKED
External dependencies	PG · ID verification · payout agency · legal · independent QA (S3) and E2E (S12) not yet run · 0 signed originals of the 155 list
2027 schedule	The Feb–Mar target requires P0 fixes and 3 contracts done by M2–M3 — high risk of delay

BABYLOG

Repository · HEAD	Store source 1.0.19+58 · B8 v23 integration candidate (v16, v19, v22 kept)
Checked on · version	2026-11-12 · App Store 1.0.7 live (source 1.0.19+58) / integrated build in development
Automated tests	B8 r23 16/16 · many rules/server tests (emulator)
P0 / P1	6 P0s OPEN — account ownership, account deletion, store URL, family sharing rules, etc. · integrated build NO-GO
External dependencies	Store price change · deploy subscription-server receipt validation
2027 schedule	Prices applied at M3 after security P0 fixes — depends on how fast P0s are resolved

Method: git log (GIT_OPTIONAL_LOCKS=0), pubspec and original reports. Some working copies were based on report records. 0 changes to repositories or production.

Development audit ② PETLOG · ONGIL

PETLOG

Repository · HEAD	PetLog-restore p4/d1-d5-records 893dbc5 · P2 candidate 90e041e · p5/carep f46e9ca
Checked on · version	2026-11-07~08 · App Store 1.0.5 live · source 2.0.23+55 / V2 in development
Automated tests	P2 candidate 332/332 · navigation 146/146 · 0 static-analysis errors
P0 / P1	No P0 on record · social feature flag OFF
External dependencies	PG contract for CARE payments · Veterinarians Act and CARE legal review
2027 schedule	V2 release at M3 is realistic · CARE-P is at foundation stage, so a full launch at M11 assumes a developer hire

ONGIL

Repository · HEAD	Newon-ongil-mobile ongil-o10-expansion-base 0c19a5e
Checked on · version	2026-10-19 (last commit) · not launched / simulator
Automated tests	Simulator 6/6 · accessibility 24/24
P0 / P1	No records (development paused)
External dependencies	Android and real-device testing · privacy policy · store review
2027 schedule	Restart Jun 2027 · final launch target Oct 2027

Next growth goal **Store versions (BABYLOG 1.0.7, PETLOG 1.0.5) and source versions (1.0.19+58, 2.0.23+55) will be unified in the next store update.**

Checked: PETLOG isolated QA on Mac p2r2t (2026-11-08), app_language.dart (12 languages), ONGIL commit log. 0 changes to repositories or production.

Operating metrics — CEO-provided results and measurement plan

Metric	BABYLOG	PETLOG	SHAREON	ONGIL
Cumulative downloads	600+ across BB and PL	(CEO-provided figure)	Before launch	Before launch
Google Play public range	10+	10+	—	—
App Store public version	1.0.7 (2026-08-17)	1.0.5 (2026-08-26)	Development build	Development build
Products on sale	Premium ₩19,900/month · ₩179,000/year	Plus ₩9,900/month · ₩99,000/year	—	—
Pricing revision (confirmed)	Family Premium ₩9,900/month · ₩99,000/year	Family Premium ₩7,900/month · ₩79,000/year	7–10% fee	Proposed price
Paid subscribers · revenue	Store console data submitted for due diligence	Store console data submitted for due diligence	After launch	After launch
Active users · retention	After analytics are connected (30 days after investment)	After analytics are connected (30 days after investment)	After launch	After launch

Counting basis

Downloads	Cumulative figure provided by the CEO — includes reinstalls and device changes, so it differs from unique users.
Subscriptions · revenue	The 18-month model excludes existing Premium/Plus revenue and starts from the repriced Family Premium.
Measurement plan	Analytics connected within 30 days of investment · baselines for active users, retention and conversion shared within 60 days
Financial outlook	Business-plan scenario from the integrated financial model.

Next growth goal **Connect analytics to all 4 apps within 30 days of investment and share baselines for active users, retention and conversion within 60 days.**

Downloads: CEO-provided figure (2026-11) · Google Play and App Store public info checked 2026-11-12. Sale prices: store check (2026-10-21).

SHAREON

Sharing & rental platform for individuals and businesses

Targeting a national full launch in Feb–Mar 2027.

Before full launch · goal: national full launch Feb–Mar 2027 · current decision Release NO-GO · Payment OFF

155 Category scheme

30 platform features

B01 · ① Business definition

SHAREON is a rental platform where individuals and businesses lend and borrow goods, equipment and spaces by the hour, day or week. It ties booking, handover/return records, payment & settlement and dispute handling into one flow, so people can trust transactions that don't transfer ownership.

① Long-term vision — scope by stage

Target Feb–Mar 2027	National launch — 155-category system · 4 transaction types C2C, B2C, C2B, B2B · booking, payment, ID verification, business verification, settlement, disputes (conditional on passing launch gates; launch date not guaranteed)
Disabled at launch	Digital passes 35 · shared use 5 · spaces on legal hold · high-risk items — enabled after legality review and rights-holder contracts
H2 2027	Stabilize transactions · repeat rentals · more business suppliers · finalize scope of the Nov 6 plan (long-term/subscription rental, urgent requests, community)
Long-term	Business asset SaaS · ads · API · overseas — price candidates only, not to be quoted externally

User journey

1	2	3	4	5
Search & request	**Approve & pay**	**Handover photos**	**Use & return check**	**Settlement & review**

Principle

Launch goal: national full launch in Feb–Mar 2027 — the 155-category scheme, 4 transaction types and all planned features. We will not cut features to hit the date; categories needing legal, license or rights-holder contracts stay disabled until legality review and contracts are complete. The launch goal is different from a launch-ready decision (currently NO-GO).

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

② Core customer segments and problems · ③ Usage scenarios

② Problems by customer segment and current alternatives

Customer segment	The real problem	Current alternatives
Single-person households · families	Burden of buying and storing rarely used items	Left unused after purchase · resold second-hand · borrowed from acquaintances
Creators · students	Short-term need for cameras, lighting and audio gear	Rental companies (minimum period & deposit) · buying
Event and production companies	Securing event equipment and spaces by the day	Rental companies · space-booking platforms · asking acquaintances
Individual suppliers	Earning from unused items + worry about disputes	Sold second-hand · left unused
Rental businesses · space operators	Filling idle stock and time	Own channels · ads · space-booking platforms

Problem → NEWON's solution

Buying and storing things used only occasionally	Rent nearby, only for the days you need
Peer-to-peer rentals feel risky (damage, returns)	Pickup/return photo records · report and dispute process
Assets of businesses and individuals sit idle	Individual and business suppliers earn from one app

③ Customer usage scenarios

Weekend camping

Search "tent" → choose supplier → request Fri–Sun booking → approval → payment → handover photos → return inspection → settlement & review

Photo studios

Space search → hourly booking (10-minute hold) → payment → check-in → cleanup time auto-blocked → settlement

Event companies

Business account → bulk booking of tables, chairs and audio → B2B 7% → settlement per round (design draft)

Next growth goal **Quantify problem size and willingness to pay through customer interviews (plan in Main IR p.4).**

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

④ All business areas and features

Goods · equipment

IT · cameras · audio — Partly built
Laptops · cameras · lighting · speakers

Camping · sports — Partly built
Tents, chairs, leisure gear (no fuel)

Tools · home appliances — Partly built
Hand tools · ladders · vacuums

Parenting · pets · travel — Partly built
Strollers · pet carriers · suitcases

Spaces

Work · meetings — Partly built
Meeting rooms · shared offices · pop-ups

Filming · rehearsal — Partly built
Studios · music · dance

Parties · events — Partly built
Private gatherings & conventions

Lodging/housing groups — Contract/legal required
Long stays prohibited by law

Digital · shared use

Official digital passes — Contract/legal required
35 official passes for OTT, education and SaaS — enabled after rights-holder contracts

Shared use · cost splitting — Contract/legal required
5 areas — enabled after legal review

Long-term · subscription rental — Planned
1/3/6/12-month contracts (new, Nov 6)

Transactions · trust

Double-booking prevention — Built
App & server DB constraints — test environment

Pickup · return check — Partly built
Fixing handover defects on both sides

ID verification · business verification — Contract/legal required
No contract with KCB, NICE or KMC

Reviews · reports · blocking — Partly built
Report & block built

Payments · settlement

Payments · PG — Contract/legal required
OFF in code · talks with Toss and PortOne

Deposits — Contract/legal required
Between the parties · method after PG contract

Settlement · payout agency — Contract/legal required
No payout-agency contract

Cancellation · refunds · disputes — In development
72h+ 100% · 24–72h 90% · <24h 70%

Businesses · communities

Business seller center — Partly built
Seller profile & draft listings

Staff · role management — In development
Server for 5 roles in development

Urgent local requests — Planned
Demand-based matching (new on 11-06)

Local community — Planned
10 boards (new on 11-06)

Built · Partly built · In development · Planned · Contract/legal required

The full 155-category system (goods 80 · spaces 35 · digital passes 35 · shared use 5) is in scope for the national launch. 30 platform features: built & verified 1 / partly built 12 / in development 4 / planned 4 / long-term 4 / contract-legal 5 (SHAREON investment appendix, 2026-11-06).

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

④ 155 categories — goods · digital · shared use

All 155 categories are in the launch scope. Detailed names for goods 80, digital 35 and shared use 5 are shown at group level because the final list has not been received.

Goods & equipment — 27 categories (80 sub-items)

01 IT & digital

02 Cameras & filming

03 Broadcast & audio

04 Camping & outdoor

05 Sports & leisure

06 Tools & DIY

07 Industrial & construction

08 Logistics & moving

09 Household & appliances

10 Furniture & interior

11 Baby & family

12 Pets

13 Fashion & luxury

14 Weddings & events

15 Kitchen & cooking

16 Education & experiences

17 Beauty

18 Health & wellness

19 Medical & senior aids

20 Office equipment

21 Retail & commercial

22 Farming & gardening

23 Pest control & environment

24 Research & lab

25 Travel & mobility

26 Culture & hobbies

27 Seasonal & special

Digital & passes — 10 areas (35 sub-items)

01 Film & TV OTT

02 Sports streaming

03 Music streaming

04 E-books & audiobooks

05 Online education

06 Games & cloud gaming

07 Software & SaaS

08 Digital creative tools

09 Corporate benefit & training passes

10 Live & event content

All disabled · only official passes contracted with rights holders and platforms are considered (no personal account rental, password sharing or unauthorized resale). Proof D-1–D-6 that terms allow it is required before enabling.

Shared use 5

Cost-sharing shared use · all disabled · sub-item names awaiting CEO confirmation

Full-launch goal and current decision

Goal: include the full 155-category scheme in the national launch · 4 transaction types. Current: 0 signed originals of the official 155 · 121 sub-item names awaiting CEO confirmation · 0 categories cleared for launch (Payment OFF · NO-GO).

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10). Goods categories & risk grades: S25 category scope draft v0.2 (before CEO approval).

④ 35 space types — all targeted for launch, with activation conditions per space

#	Spaces	Group	Stage
01	Meetings · business	A	Base requirement
02	Offices · coworking	A	Base requirement
03	Education · lectures · training	A	Legal check
04	Exhibitions · galleries	A	Legal check
05	Pop-up stores · showrooms	A	Base requirement
06	Stores · commercial spaces	A	Legal check
07	Conventions · large events	A	Base requirement
08	Photo · video shoots	B	Base requirement
09	Broadcast · recording · production	B	Further check
10	Music · dance practice	B	Base requirement
11	Performance · theater	B	Legal check
12	Film · screening	B	Legal hold
13	Workshops · studios	B	Legal check
14	Book clubs · culture groups	B	Further check
15	Parties · private gatherings	C	Base requirement
16	Cafés · lounges	C	Legal hold
17	Restaurants · dining	C	Legal hold
18	Shared kitchens · cooking	C	Legal hold
19	Weddings · family events	C	Legal check
20	Rooftops · terraces · gardens	C	Legal check
21	Indoor sports	D	Legal check
22	Outdoor sports · leisure	D	Legal check
23	Fitness · wellness	D	Legal check
24	Beauty · salons	D	Legal hold
25	Pet spaces	D	Legal check
26	Private houses · stays · workshops	E	Legal hold
27	Hanok · traditional culture	E	Legal hold
28	Short-stay living	E	Legal hold
29	Warehouses · storage	F	Legal hold
30	Workshops · industrial facilities	F	Legal hold
31	Logistics · loading	F	Legal hold
32	Parking · garages	F	Legal hold
33	Camping · outdoor sites	G	Legal hold
34	Farming · gardening spaces	G	Legal hold
35	Research · labs · special facilities	G	Legal hold

Group A work, education & commerce · B culture, arts & content · C gatherings, food & events · D sports, health & living · E lodging, housing & heritage (no long stays) · F industrial · G outdoor & special. Eight common checks apply to every space (operating authority · sublease consent · actual use · business registration · fire safety · operator verification · public information · usage rules).

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10). Space list & stages: S13 space_taxonomy35 r1 (2026-11-02).

⑤ Actual development and release status by feature

Released features and in-development or planned items are separated in one table.

Feature	Status	Evidence & limits
Double-booking prevention	Built	Server DB constraints · test DB
8-step item listing	Partly built	App build · automated tests · simulator
Space booking (hold → confirm → check-in)	Partly built	Space listing partly built
Location · category search	Partly built	Map & distance filter incomplete
Request → approval booking	Partly built	Confirmed but disabled with Payment OFF
Pickup · return check	Partly built	Fixing handover defects on both sides
Photo · condition records	In development	Photo GPS removal on listings built; handover photos in development
Chat · notifications	In development	Candidate G-1 fix to block personal-data exposure
Cancellation · refunds · disputes	In development	Code does not match confirmed refund rules (P0)
Staff · role management · business verification	In development	Server for 5 roles in development · verification provider not selected
Payments · PG	Contract/legal required	OFF in code · talks with Toss, reply from PortOne · 0 contracts · P0 defect on payment deadline
ID verification	Contract/legal required	KCB form (unsigned) · policy default ON
Settlement · payout agency	Contract/legal required	Quote reply from COOCON · 0 contracts
Deposit handling	Contract/legal required	Only 0 allowed while Payment OFF
Official digital passes 35	Contract/legal required	All disabled · requirements D-1–D-6
Shared use 5	Contract/legal required	All disabled · before legal review
Reviews · reports · blocking	Partly built	Report & block built · review gating
Business seller center	Partly built	Seller profile & draft listings
Admin · customer support	Partly built	Review, report, dispute, refund and settlement-hold APIs partly built
Trust profile · Share Score	Planned	Policy design · decision not to show externally
Late returns · no-shows	Planned	No automatic late fees (confirmed)
Long-term/subscription rental · urgent requests · community	Planned	New plan (Nov 6) · 0 dev docs · launch scope TBD
Business asset SaaS · ads · API · overseas	Long-term	Price candidates only — not to be shown externally

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

⑥ Free vs paid · ⑦ Confirmed fees, subscriptions & ad policy

⑥ Free vs paid

Features & products	Free / Paid	Target
Search · browse · favorites	Free	Users
Item · space listing	Free (₩0 listing fee and monthly fee)	Suppliers
Booking requests · chat	Free	Both sides
Completed transactions	7–10% fee (borne by lender)	Suppliers
Renter fee	₩0	Users
Deposits	Between the parties · no fee · not revenue	User → supplier
Business SaaS · ads	Long-term — price TBD (not to be shown externally)	Businesses

⑦ Pricing & fee policy — confirmed · currently on sale · proposed

Policy	Prices & rates	Status
C2C fee	10%	Confirmed policy
B2C fee	8%	Confirmed policy
C2B fee	10%	Confirmed policy
B2B fee	7%	Confirmed policy
PG · settlement costs	Included in the fee (borne by the platform)	Confirmed policy
Early-partner discount	None (the 5% preferential rate in the 10-31 guide was removed on 11-06)	Confirmed policy
Cancellation · refunds	100% if 72h+ before · 90% at 24–72h · 70% under 24h	Confirmed policy
Late fees	No automatic charge	Confirmed policy
Minimum fee	TBD — CEO decision needed	In progress

₩0 onboarding, listing and monthly fees. ₩0 user fee. Deposits are not revenue and carry no fee. Transaction value (GMV) is not revenue.

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

⑧ Payers and billing timing by revenue model

Full revenue model

	Revenue streams	Structure & pricing	Payer	Status	Activation
01	**C2C transaction fee**	10% of transaction value	Suppliers	Confirmed policy	Full launch (M4)
02	**B2C transaction fee**	8% of transaction value	Rental companies	Confirmed policy	Full launch (M4)
03	**C2B transaction fee**	10% of transaction value	Suppliers	Confirmed policy	Full launch (M4)
04	**B2B transaction fee**	7% of transaction value	Businesses	Confirmed policy	Full launch (M4)
05	**Long-term · subscription rental**	Keep all 4 rates · verify settlement per cycle	Suppliers	Planned	Follow-up
06	**Digital passes**	Fee policy not confirmed · enabled after rights-holder contracts	—	Contract/legal required	After contract
07	**Business SaaS · ads**	Price candidates only — not to be shown externally	Businesses	Long-term	Long-term

⑧ Payers · billing timing · settlement path

Revenue streams	Payer	Billing timing	Payment & settlement path	Refunds & cancellations
C2C · C2B fee	Individual suppliers	Deducted at settlement after use	PG → payout agency → supplier account	Fee returned on refund
B2C fee	Rental companies & space operators	Same	Same	Same
B2B fee	Business suppliers	Per round (design draft)	Settlement per round (design draft)	Per contract
Deposits	User → supplier	Method decided after PG contract	No fee	After return inspection

Now	Preparing launch · payment and ID-verification contracts in progress
In the 18-month model	4 transaction fees · search, recommendation and promotion ads · brand campaigns
Long-term expansion	Long-term/subscription rental · digital passes · asset management SaaS/API

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

⑦-2 Ads & business products and 18-month revenue outlook

Revenue streams	Prices & rates	Category	Payer · billing
Rental fee C2C · C2B	**10%**	Confirmed	Lender · at settlement after use
Rental fee B2C	**8%**	Confirmed	Rental companies & space operators
Rental fee B2B	**7%**	Confirmed	Business suppliers
Sponsored ads in search results	30 days ₩99,000	Proposed price	Rental companies & space operators · prepaid
Local & category recommendation ads	30 days ₩59,000	Proposed price	Local rentals & spaces · prepaid
Business supplier promotions	₩199,000/month	Proposed price	Business suppliers · features & top placement
Brand campaigns & partner ads	From ₩2,000,000 per campaign	Proposed price	Equipment brands · local companies
Corporate asset-management SaaS & API	Business contracts	Long-term	Business · after 18 months

18-month revenue — ₩300M base (excl. VAT)

Total ₩48.6M · accelerated scenario ₩166M

How ad revenue is calculated

Ad revenue = advertisers × product price × frequency
Advertisers = SHAREON business suppliers (base scenario: 40 at launch → 250 by M18)
Purchase rates = search 6% · recommendation 6% · promotion 2% (base) · starting 2 months after launch

Fee policy

- ₩0 user fee, onboarding fee and monthly fee
- PG and settlement costs are borne by the platform and included in the fee
- Ads labeled "Ad" · run alongside search-quality standards

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10). Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑨ Customer acquisition and business sales strategy

Secure supply first (M1–M3)

Direct sales to rental companies and space operators before launch → free pre-onboarding · photography and listing on their behalf. Starting with high-supply camping, tools, baby goods, event equipment and filming spaces

User acquisition after national launch

National listing, search and transactions available. Search ads (period keywords like "tent rental") & communities · BABYLOG & PETLOG notices (consent-based) · ₩3M/month (₩300M plan). Ads go first to categories and regions where supply has gathered

Repeat rentals

Review & re-rental reminders · regular suppliers · seasonal features

Business supplier sales

B2C 8% and B2B 7% from launch · business seller center, staff roles, business verification · targeting event, filming and education companies

Partnerships (details: G02)

Onboarding talks with ONENEX (corporate IT-equipment rental) and Studio EIM (spaces) · talks with 6 PG, ID-verification and settlement providers — 0 contracts

Acquisition channels & barriers to entry (summary of business materials)

Initial market	National launch · pre-launch supply sales start with 5 supply-rich categories (camping, tools, baby gear, event equipment, filming spaces)
Acquisition path	Supplier pre-onboarding (listing done for them) → national search ads and communities → BABYLOG/PETLOG referrals (consent-based)
Barrier to entry	Supplier relationships and transaction/review data — built up from launch

Next growth goal **Measure actual acquisition cost per channel within 2 months of launch and replace the model's assumption.**

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

⑩ Competition & differentiation · ⑪ Market evidence & outlook

⑩ Main competitors & alternatives

Competitors & alternatives	Structure	Gap · threat
Daangn (second-hand)	Ownership transfer · 21M+ monthly users (company announcement)	No rental period, return or settlement flow → direct threat if they add rentals
Hygglo (Nordics, UK)	Peer-to-peer rental · lender 20% + renter 10%	Not in Korea · basis for rate comparison
SpaceCloud	Hourly space booking · fee about 6–7%	Competes with space B2C at 8% · no goods
Rental businesses	Long-term, high-priced · own online store	Targets for onboarding as B2C suppliers
District tool libraries	Free or low cost · limited hours and stock	Complement

⑪ Market size evidence — size of demand, not number of customers

Market evidence	Sources	Meaning
Single-person households 8.24M (36.6%)	Statistics Korea 2025 Population and Housing Census (published 2026-07)	Size of short-term usage demand
Space booking cumulative GMV ₩33B	SpaceCloud company announcement	Hourly space booking market exists
Daangn monthly users 21M+	Daangn company announcement	Habit of local transactions

⑪ Key assumptions of the business plan

- Willingness of individuals to lend items to strangers
- Speed of securing supply by category at launch (national listing available ≠ national transactions active)
- Average transaction ₩46,100 · mix C2C 66% · B2C 28% (all 4 types from launch)
- 50 in the first month → 923/month by M18 (base)
- Re-rental rate · dispute rate 1%

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10). References: Statistics Korea, SpaceCloud interview (VentureSquare 2026), Hygglo official blog (2025-10-02), Daangn 2025 results coverage. Competitor comparison based on public information.

⑫ Unit economics

Calculated as what one unit (transaction, subscription, booking) leaves after VAT, store, PG and settlement costs.

Item	Amount	Sources
Average per transaction (weighted across 4 types)	₩46,100	Assumption
Fee (weighted average, incl. VAT)	₩3,914	Calculation
VAT & refunds 3%	−₩463	Calculation
PG 3.4% × 1.1 (borne by the platform)	−₩1,724	Published rate
Settlement ₩150 · ID verification ₩100 · disputes ₩150 · CS ₩500	−₩900	Assumption
Contribution margin	₩827	Calculation
Contribution margin of one ₩25,000 C2C rental	About ₩370 · loss below about ₩18,000	Calculation
User acquisition cost	₩7,000 → payback in about 8.5 transactions	Assumption
SHAREON standalone break-even	About 11,600 per month (SHAREON standalone IR 11-06)	Calculation

Monetization assumptions in the 18-month model

- Transaction mix C2C 66 · B2C 28 · C2B 2 · B2B 4% (all 4 types from full launch)
- Contribution margin of one ₩25,000 C2C rental about ₩370 — business and repeat transactions are key
- About 8.5 transactions to recover ₩7,000 acquisition cost per user
- Refunds 3% · PG 3.4% (published standard rate, not a contract rate) · settlement, ID verification, disputes & CS ₩900

NEWON 18-month financial model assumptions. The settlement-cost assumption differs from the standalone SHAREON appendix (₩150), so C2C contribution margin differs by ₩100.

Next growth goal **Recalculate unit economics with the contracted PG rate and actual average prices.**

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10). Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑬ Security, legal & regulatory review items

Area	Review items	Current	Status
E-commerce intermediary	Intermediary notice & scope of liability · terms	Legal review M2	Contract/legal required
E-finance · PG	Payment agency & settlement structure · whether prepaid value is transferred	PG contract M3	Contract/legal required
ID verification	Choose among KCB, NICE, KMC · default ON · minors blocked	Contract form	Contract/legal required
Personal data · location data	Shown at neighborhood level · exact location hidden · photo GPS removed · exposure in chat blocked (G-1)	Fix candidate	In development
Space operations	Operating authority, sublease consent, business registration, fire safety · no lodging or housing	Activation conditions per space	Planned
High-risk items	Safety grades · listing of e-mobility devices and medical devices blocked	Policy design	Planned
Digital passes	Proof D-1–D-6 that terms allow transfer/rental · rights-holder contracts	All disabled	Contract/legal required
Security	External security review before launch decision · confirm candidate P0 on session identity spoofing	M3	Planned

Legal content is a list of review issues, not a legal opinion. External legal review is budgeted for M2 and M8 after investment.

Next growth goal **Disable risky features or revise the terms based on the external legal review.**

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10).

⑭ Monthly development & commercialization schedule · ⑮ KPIs and completion criteria

⑭ 18-month schedule (M1 = 2026-12)

Month	Development & release	Commercialization & customers
M1 · 2026-12	Fix P0 defects · incorporate	Confirm the official launch scope and category text · start supplier sales
M2 · 2027-01	Refund & settlement on server · personal-data exposure blocked	Legal review · apply for PG merchant, ID verification and payout-agency contracts
M3 · 2027-02	PG, ID verification and payout integration · independent QA and E2E · external security review	Pre-onboarding & listing on suppliers' behalf · **launch decision**
M4 · 2027-03	**National launch (conditional)** · operations tools	Fees live for all 4 types · search ads · ops/CS hire joins
M5 · 2027-04	Developer joins · stabilization	Encourage reviews & re-rentals
M6 · 2027-05	Strengthen business seller center	More rental companies · metrics published
M7 · 2027-06	Decision on enabling digital passes & shared use	Reflect legal review and rights-holder contract results
M8 · 2027-07	Shared settlement engine (reused for PL CARE)	Expand business sales
M9 · 2027-08	Business bulk booking & settlement per round	Expand B2B contracts
M10 · 2027-09	Scope of 3 new plans confirmed	Seasonal features
M11~M12	Long-term & recurring rentals (if confirmed)	Material for follow-on fundraising decision
M13~M15	Urgent requests & community (if confirmed)	Expand supply regions
M16~M18	Business reports · advanced operations	923 transactions/month (base · assumption)

⑮ KPIs · completion criteria

KPI	Definition	Decision date	Completion criteria
Launch decision	0 P0s · independent QA and E2E · 3 contracts · legal · security review	M3	Launch when all pass
Pre-onboarded suppliers	Minimum listings per category	M3	Criteria met per category
Request → completion rate	Payments completed ÷ booking requests	M6	Baseline published
Repeat rental rate	Share of users transacting again within 90 days	M9	Improvement over baseline
Dispute rate	Disputes filed ÷ transactions	Ongoing	≤1% (assumption)
Contribution margin per transaction	Based on actual rates	M9	Within ±30% of ₩827
Monthly transactions	Completed payments	M18	Base 923 · conservative 239

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10). Schedules and targets are plans and assumptions.

⑯ Key execution tasks and responses · investor questions

Execution tasks	Importance	Response strategy	Warning signal
Launch gate delay	High	Delay the launch date without cutting features · keep Payment OFF · postpone marketing	Fails M3 launch decision
Schedule load of the full scope	High	Categories needing legal/contract work launch disabled · developer in M5 · outsourced QA	Rate of P0 reduction
Supply shortage	Medium	Focus marketing on categories and regions where supply has gathered · listing done on suppliers' behalf	Listings per category below target
Damage · disputes	Medium	Handover/return photos · dispute procedure · insurance bought by the lender	Dispute rate above 1%
Thin C2C margin	High	Grow business transaction share · consider a minimum fee	C2C share above 80%
Entry of a large platform	Medium	Get ahead on supplier relationships and review data	Competitor launches a rental feature

Questions investors ask first

Q. Why don't second-hand apps take this market?

Optimized for ownership-transfer deals, they lack rental period, handover, return and settlement flows. They could still enter, so we need to build supplier relationships first.

Q. Isn't the margin per transaction too thin?

C2C is thin at about ₩370. Business transactions (B2C, B2B) and repeat rentals lift the average to ₩827; this assumption will be validated after launch.

Q. How will supply be filled?

For 3 months before launch we sell directly to rental companies and space operators and list on their behalf. 2 onboarding talks replied (CEO-confirmed); 0 contracts.

Q. When will payments go live?

Incorporation → PG merchant, ID verification and payout-agency contracts → legal review, independent QA, external security review → M3 launch decision. Payment OFF stays until all pass.

Q. Damage and disputes?

Handover/return photo records, report and dispute procedures, deposit (between the parties). No automatic late fees; lenders buy insurance themselves.

Q. Break-even?

SHAREON standalone break-even is far off at about 11.6K transactions a month. The 18-month goal is to validate transactions and repeat rate, not profitability.

Sources: SHAREON investment detailed appendix (2026-11-06) · S25 and S26 policy & test reports (11-02~03) · code cross-check (11-04) · B8 report (11-10). Break-even transaction count is about 11,600 per month per the SHAREON standalone IR (11-06, including ID-verification cost). All transaction targets are financial-model assumptions.

BABYLOG

Family growth record platform

One child, one profile, the whole family together.

Live · App Store 1.0.7

6
Life stages

16
business areas

C01 · ① Business definition

BABYLOG collects a child's growth, health and daily records — from pregnancy planning through birth, infancy and school age — in one profile that parents, grandparents and caregivers view together. Core records stay free; revenue comes from Family Premium at the moment the family uses it together.

① Long-term vision — scope by stage

H1 2027	Fix security P0s · release integrated build · apply Family Premium ₩9,900
H2 2027	Institution PoC (postnatal centers, daycare) · school-age records
2028	Education/experience booking · corporate family benefits · commerce partnerships
Long-term	18 years of records from pregnancy to high school graduation · hand-over of rights to the child · child protection and donation links

User journey

1	2	3	4	5
Register child	**Invite family**	**Daily records**	**Growth & vaccine alerts**	**Family Premium**

Principle

Child photos and names on screens are examples. Children's records are never passed to partners or used for ad targeting, and data on children under 14 is handled under a legal-guardian consent structure.

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21).

② Core customer segments and problems · ③ Usage scenarios

② Problems by customer segment and current alternatives

Customer segment	The real problem	Current alternatives
Parents of children aged 0–3	Feeding, sleep and growth records are scattered · hard to share with a spouse	Free record apps · memos · messengers
Grandparents · caregivers	Hard to know the child's condition today when taking over care	Phone & messengers
Families preparing for pregnancy	Prenatal records and information search	Communities · clinic notebooks
Families with preschool and elementary children	Infant apps stop being useful · school and institution schedules	School apps · memos
Postnatal centers · daycare · companies	Family communication · employee benefits	Own apps · notice apps (institution features planned)

Problem → NEWON's solution	
Records scattered across family members	Shared records in a family group (up to 5)
Record apps are dropped as the child grows	One profile from pregnancy to school age
Hard to find stage-appropriate information and services	Stage-based info · links to institutions and commerce (planned)

③ Customer usage scenarios

First week after birth

Register child → invite spouse & grandparents → log feeding & sleep → whole family sees the same screen → weekly summary

Grandparent care day

Check today's records from the grandparent account → log nap and meals → notify parents

Vaccinations

Vaccination reminder → clinic info (official link) → vaccination record → growth chart

Next growth goal **Quantify problem size and willingness to pay through customer interviews (plan in Main IR p.4).**

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21).

⑥ Free vs paid · ⑦ Confirmed fees, subscriptions & ad policy

⑥ Free vs paid

Features & products	Free / Paid	Target
Core records (feeding, sleep, growth, vaccinations)	Free	Parents
Family invites	Free (invited family)	Grandparents & caregivers
Ads	AdMob for free users · no targeting on children's sensitive data	—
Family Premium	₩9,900/month · ₩99,000/year (confirmed policy)	Primary payer
Current Premium	₩19,900/month · ₩179,000/year (on sale)	Parents
Shopping & group buys · expert second-hand	Sales fee 8% · 7% (confirmed) · personal direct trades 0%	Seller
Institutions & booking	Proposed / not confirmed	Institutions & businesses

⑦ Pricing & fee policy — confirmed · currently on sale · proposed

Policy	Prices & rates	Status
Family Premium, monthly	₩9,900	Confirmed policy
Family Premium, annual	₩99,000 (₩8,250 per month)	Confirmed policy
Current Premium, monthly	₩19,900 (store)	Live
Current Premium, annual	₩179,000 (store · materials show ₩169,000–179,000)	In progress
Shopping & group buys	Sales fee 8%	Confirmed policy
Expert second-hand	Sales fee 7% (personal direct trades 0%)	Confirmed policy
Kids café booking	8% (proposed)	Planned
Experience/class booking	10% (proposed)	Planned
Medical institutions	0%	Confirmed policy
Corporate family benefits	Company-wide passes — price TBD	Planned

Confirmed prices apply in the stores when Family Premium launches. Education, experiences, institutions and commerce have no confirmed prices and are not in the 18-month model.

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21).

⑧ Payers and billing timing by revenue model

Full revenue model

	Revenue streams	Structure & pricing	Payer	Status	Activation
01	**Family Premium (monthly)**	₩9,900 · group of up to 5	Parents	Confirmed policy	After pricing applied
02	**Family Premium (annual)**	₩99,000 (₩8,250 per month)	Parents	Confirmed policy	After pricing applied
03	**Current Premium**	₩19,900/month · ₩179,000/year	Parents	On sale	Live
04	**Commerce partnerships**	Partner links · rate not confirmed	Seller	Partly built	Short-term
05	**Education · experience booking**	Fee not confirmed	Businesses	Planned	Mid-term
06	**Corporate family benefits · institutions**	Passes & solution subscriptions not confirmed	Businesses · institutions	Planned	Mid-term
07	**AI add-ons**	Included in Premium or add-on · not confirmed	Parents	Planned	Mid-term

⑧ Payers · billing timing · settlement path

Revenue streams	Payer	Billing timing	Payment & settlement path	Refunds & cancellations
Family Premium	Primary payer (parent)	Store recurring payment (monthly/yearly)	Apple · Google → NEWON (store fee assumed 15%)	Store refund policy
Education/experience booking	Businesses	Booking completed	After PG contract	TBD
Corporate family benefits	Businesses	Annual contract	Tax invoice	Per contract
Shopping, group buys & expert second-hand	Onboarded sellers	Deducted at settlement on purchase confirmation	PG → settlement → seller	Refund rules for seller-caused issues

Current revenue	Premium subscription on sale — revenue not yet checked against the store console
In the 18-month model	Family premium · shopping, group buys & expert second-hand · experience booking · affiliate links · ads · institution SaaS · ₩14.6M over 18 months (base, assumption)
Principles	Core records stay free · existing subscribers keep the same access after the revamp · 0% fee for medical institutions · 0% for personal direct second-hand trades

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21).

⑦-2 Ads & business products and 18-month revenue outlook

Revenue streams	Prices & rates	Category	Payer · billing
Free records	₩0 — feeding, sleep, growth, vaccinations	Stays free	—
Family Premium	**₩9,900/month · ₩99,000/year**	Confirmed	Primary payer · family of up to 5
Ads for parenting, education & family services	Sponsored content & banners ₩100,000 per 30 days	Proposed price	Baby goods, education & family services
Sponsored search & recommendation content	Same price as ads	Proposed price	Brands · shown in life-stage context
Shopping · group buys	**Sales fee 8%**	Confirmed	Onboarded sellers · on purchase confirmation
Expert second-hand	**Sales fee 7%**	Confirmed	Expert sellers (personal direct trades 0% · not revenue)
Experience & kids-café booking	Kids café 8% · experiences 10%	Proposed price	Venues · after contract (hospital booking 0%)
External affiliate-link commerce	Affiliate fee 5% (assumption)	Assumption	Affiliate retailers
Clinic, postpartum-center & education-institution SaaS	₩99,000/month	Proposed price	Institutions · monthly contract
Brand campaigns · advanced AI features	Per campaign · subscription add-on	Long-term	Brands · parents

18-month revenue — ₩300M base (excl. VAT)

Family Premium	**₩9.4M**
Shopping & resale	**₩1.4M**
Booking fees	**₩0.27M**
Affiliate links	**₩0.08M**
Parenting ads	**₩2.1M**
Institution SaaS	**₩1.3M**

Total ₩14.6M · accelerated scenario ₩42.9M

Ad principles

- Children's records, health information and personal data are never used for ad targeting
- Sensitive records are never sold commercially
- Ads shown only in the context of life-stage content · core records stay free

Base scenario calculation

Subscriptions: 131 paying families at M18 × ₩7,012 net/month
Shopping: from M5, 1.5% of actives × ₩35,000 × weighted 7.9%
Ads: from M9, 1 advertiser → +0.3/month · institution SaaS: from M12

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21). Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑨ Customer acquisition and business sales strategy

App store optimization

Store copy in 12 languages · keywords such as "baby feeding log" · better screenshots

Family invite loop

Family invites per child → invited family registers another child (measured after launch)

Ads

Store search ads ₩0.5M/month (₩300M plan) · CPA ₩4,000 assumed

Institution PoC

Propose a free PoC to 1 postpartum care center or daycare → family sign-ups via the institution

Corporate partnerships

Hyundai Home Shopping (life-stage product guidance) OI proposal · corporate family-benefit proposal — not signed

Acquisition channels & barriers to entry (summary of business materials)

Initial market	Existing users of the live app · families with newborns · overseas families in 12 languages
Acquisition path	App store optimization · family invites · postnatal-center PoC (proposed) · commerce partnerships
Barrier to entry	Family accounts and years of records — switching cost (measured after launch)

Next growth goal **Measure actual acquisition cost per channel within 2 months of launch and replace the model's assumption.**

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21).

⑩ Competition & differentiation · ⑪ Market evidence & outlook

⑩ Main competitors & alternatives

Competitors & alternatives	Structure	Gap · threat
Free infant record apps	Free · ads · focused on ages 0–3	BABYLOG records are free too — differentiated by family-level, long-term records
Parenting communities	Information & community-centered	Record-based community
Messenger group chats	Free · habit-forming	Structured records & permission management
Daycare notice apps	Institution-centered	Family-centered · institution links planned

⑪ Market size evidence — size of demand, not number of customers

Market evidence	Sources	Meaning
Ages 0–19: 7,459,533 (14.6% of population)	Ministry of the Interior and Safety resident registration statistics · end of 2026-10	Ages 0–9: 2,854,343 · 10–19: 4,605,190 — customer scope, not paying users or TAM
UI in 12 languages	App repository	Distribution scope — not overseas customer results

⑪ Key assumptions of the business plan

- Willingness to pay ₩9,900/month per family
- New → paid conversion 2% · paid monthly churn 8%
- Family invite rate (family members invited per child)
- Share continuing into school age
- Institutions' willingness to pay after the PoC

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21). Competitor app prices were not compared because official data was not available. The problem definition is a design hypothesis and operating experience.

⑫ Unit economics

Calculated as what one unit (transaction, subscription, booking) leaves after VAT, store, PG and settlement costs.

Item	Amount	Sources
Family Premium month	₩9,900	Confirmed
VAT	−₩900	Calculation
Store fee 15%	−₩1,350	Assumption (small-business program)
Monthly plan net revenue	₩7,650	Calculation
Annual plan, monthly-equivalent net revenue	₩6,375	Calculation
Monthly/yearly 50:50 average	₩7,012	Assumption
Paid acquisition cost (CPA)	₩4,000 ÷ 2% conversion = ₩200,000 per paying user	Assumption
Expected retention per paying user	8% churn → 12.5 months on average → net revenue about ₩87,600	Calculation

Monetization assumptions in the 18-month model

- 400 organic new users/month (+3%/month) + ads (CPA ₩4,000)
- 2% of new users convert to paid · paid monthly churn 8%
- Monthly/yearly 50:50 → net revenue ₩7,012 per family per month
- M18: 131 paying families · ₩9.4M subscription revenue over 18 months

The 15% store fee is based on Apple's Small Business Program. Actual conversion and churn will be replaced with console data after launch.

Next growth goal **Recalculate unit economics with the contracted PG rate and actual average prices.**

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21). Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑬ Security, legal & regulatory review items

Area	Review items	Current	Status
Children's personal data	Legal guardian consent under age 14 · permissions transferred as the child grows	Structure design	Partly built
Sensitive data	Health records stored on device first · only family-shared items on server	Implementation	Built
Ads	AdMob · no targeting on children's sensitive data · labeled "Ad"	Operations	Live
Medical	No medical-judgment wording · AI report is a summary	Operations	Live
Account security	Ownership switched to unique account ID · account deletion handled	P0 OPEN	In development
Subscription	Server receipt verification · notice and consent on price changes (E-Commerce Act)	Not deployed	In development
Missing persons · location	No location tracking or missing-person response · legal requirements reviewed first	Long-term	Long-term

Legal content is a list of review issues, not a legal opinion. External legal review is budgeted for M2 and M8 after investment.

Next growth goal **Disable risky features or revise the terms based on the external legal review.**

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21).

⑭ Monthly development & commercialization schedule · ⑮ KPIs and completion criteria

⑭ 18-month schedule (M1 = 2026-12)

Month	Development & release	Commercialization & customers
M1 · 2026-12	Fix security P0s · integrated QA	Connect analytics
M2 · 2027-01	Deploy family-sharing server rules · re-verify on real devices	Measure D30 baseline
M3 · 2027-02	Apply pricing revision · release integrated build	Family Premium ₩9,900 applied · invite campaign
M4 · 2027-03	Community enhancements	Ads ₩0.5M/month · conversion measured
M5 · 2027-04	Launch in-app shopping, group buys & expert second-hand (after PG contract)	Seller onboarding · fees 8% · 7%
M6 · 2027-05	Institution PoC preparation	Postpartum-center PoC proposal · metrics published
M7~M9	Grandparent & caregiver role screens · school-age records	1 institution PoC
M10~M12	Institution features (alerts & sharing) · launch experience & kids-café booking (after legal review)	PoC results · paid-conversion decision · booking 8–10% (proposed)
M13~M15	Expand education booking (proposed rate)	Corporate family-benefit proposal
M16~M18	Record export · long-term storage	131 paying families (base · assumption)

⑮ KPIs · completion criteria

KPI	Definition	Decision date	Completion criteria
Security P0	Open issues	M1	0
D30 retention	Share active 30 days after sign-up	M2	Baseline published
Family invite rate	Family members invited per child	M3	Baseline published
Paid conversion rate	New → Family Premium	M6	Measured vs. 2% (assumption)
Monthly paid churn	Cancellations ÷ paid	M6	≤8% (assumption)
Paying families	As of M18	M18	131 (base) · 37 (conservative)
Institution PoC	Signed PoCs	M12	1 site

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21). Schedules and targets are plans and assumptions.

⑯ Key execution tasks and responses · investor questions

Execution tasks	Importance	Response strategy	Warning signal
Free competitors	High	Core records stay free · charge only for family-level value	Conversion below 1%
Child-data incident	Low · critical	Stored on device first · not shared · no expansion before P0s are fixed	Security review findings
Revenue drop from lower price	Medium	Existing subscribers keep their entitlements · offset by more family-level conversions	Revenue drop after revision
Drop-off at school age	Medium	Step-by-step screens · school schedule	Activity drops after age 4
One-developer bottleneck	High	Developer at M5 · narrower integrated-build scope	P0s unresolved for long

Questions investors ask first

Q. Why pay when there are many free apps?

Personal records stay free; we charge only for the value of family use (shared records, sharing, reports). Paid conversion will be measured after the pricing revision.

Q. It's already launched — what are the results?

Launched June 2026; App Store 1.0.7 live. Downloads 600+ across BB and PL (CEO-provided); subscription figures will be submitted from the store consoles during due diligence. Not used in the IR.

Q. Why lower the price?

The current ₩19,900 is an individual price. Lowering the barrier to family-level conversion with Family Premium ₩9,900 is confirmed policy.

Q. Is children's data safe?

Children's records are stored on device first, never passed to partners or advertisers, and require legal-guardian consent. Fixing security P0s is a precondition for expansion.

Q. Will families really stay through school age?

The infant stage is most complete; preschool and elementary are partial; middle and high school are at the planning stage.

Q. When will institution revenue start?

Postpartum centers, daycare and corporate benefits are at the proposal stage and will start as PoCs after institution features and the consent structure are deployed.

Sources: BABYLOG partnership deck (2026-10-29) · repository docs (10-16~29) · B7 and B8 reports (11-09~10) · store check (10-21). All growth metrics (retention, invite rate, conversion) will be measured once analytics are connected in the live app, with baselines published within 2 months of investment.

PETLOG

Integrated pet-life platform

From daily records to care and booking.

Live · iOS & Android · V2 in development

12
Supported languages

3 pillars
revenue model

D01 · ① Business definition

PETLOG is a pet-life platform that builds pet social, personal care (CARE-M), professional business booking (CARE-P) and pet-friendly places & travel on top of pet health and daily records shared with co-guardians. It earns from three pillars: guardian subscriptions, care and booking fees, and business subscriptions and ads.

① Long-term vision — scope by stage

H1 2027	V2 release (social, navigation, expanded records) · Family Premium ₩7,900
H2 2027	CARE-P pilot region · CARE payments (after PG contract)
2028	CARE-P full launch · business premium · ad products · CARE-M · second region
Long-term	Pet-friendly places & travel · commerce · lost pets, adoption, rescue, donation, volunteering

User journey

1	2	3	4	5
Create profile	**Daily records**	**Family sharing**	**Social · community**	**Care · booking**

Principle

Pet photos and names on screens are examples. Health features provide records and information only — no diagnosis, prescription or care brokering (pending Veterinarians Act review).

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

② Core customer segments and problems · ③ Usage scenarios

② Problems by customer segment and current alternatives

Customer segment	The real problem	Current alternatives
Guardian (main user)	Health and daily records scattered across notebooks and memos	Notebooks · memos · clinic records
Co-guardian families	No one knows who walked or fed the pet	Group chats
Individual care providers (CARE-M)	Neighbor pet-sitting opportunities · proof of trust	Acquaintances · pet-sitter apps
Grooming · hotels · daycare (CARE-P)	Booking management · no-shows · new customers	Phone · messengers · booking apps
Local businesses · brands	Shown to pet guardians	Social ads · local communities

Problem → NEWON's solution

Health records scattered across notebooks and memos	20+ record types · vaccinations · PDF
Care and bookings via messenger and phone	CARE-M personal care · CARE-P business booking
No information on pet-friendly places or travel	Pet-friendly places · travel (planned)

③ Customer usage scenarios

Daily records

Log meals, toileting, walks and weight → share with co-guardians → weekly stats → PDF for the vet

Grooming bookings (V2)

CARE-P business search → time booking → payment (after PG contract) → service → 8% business fee settled → review

Care while traveling (planned)

CARE-M neighbor pet sitter → time-limited shared access → care log → 12% provider fee settled

Next growth goal **Quantify problem size and willingness to pay through customer interviews (plan in Main IR p.4).**

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

"Live" = app released in stores. "In development" = V2 branch (P2 navigation · P4 record expansion 11-07 · P5 CARE-P), not released. "Confirmed policy" = prices and rates set, not yet sold or operated. Sources: PETLOG partnership deck (10-29), repository and Mac QA (11-05~08).

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

⑤ Actual development and release status by feature

Released features and in-development or planned items are separated in one table.

Feature	Status	Evidence & limits
Pet profiles · 7+ species	Live	Released apps
Health records (clinic, medication, weight, temperature, check-ups)	Live	Released apps
Daily records (meals, toileting, walks, play)	Live	Released apps
Vaccinations · calendar	Live	Released apps
Statistics · PDF for vet visits	Live	Released apps
Co-guardians (invite code)	Live	Improving permissions and isolation security
Pet notes · albums · community	Live	Released apps
Plus subscription (₩9,900)	Live	On sale · server verification not deployed (mock 55/55)
AI health report	Partly built	On-device rule-based · not medical judgment
Pet social (photos, videos, follows, feed)	In development	V2 branch · video and follow not released
CARE-P business booking	In development	V2 P5
CARE-M personal care	In development	V2 · before ID and insurance review
Navigation redesign · expanded records	In development	P2 · P4 (11-07)
Life tab (shopping, second-hand, booking)	Planned	Shown as "coming soon" in the released app
Walk map GPS	Planned	Not built
Pet-friendly places · travel	Planned	Planned
Lost pets · adoption · rescue · donation	Long-term	Long-term · 0% fee

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

⑥ Free vs paid · ⑦ Confirmed fees, subscriptions & ad policy

⑥ Free vs paid

Features & products	Free / Paid	Target
Health & daily records · vaccinations	Free	Guardians
Co-guardians	Free	Families
Social · community	Free	Guardians
Family Premium	₩7,900/month · ₩79,000/year (confirmed)	Guardians
CARE-M	Provider 12%	Care providers
CARE-P	Business 8% (total booking amount)	Businesses
Business Premium	₩29,900/month · ₩299,000/year	Businesses
Adoption, rescue and vet booking inquiries	0% fee	—

⑦ Pricing & fee policy — confirmed · currently on sale · proposed

Policy	Prices & rates	Status
Family Premium, monthly	₩7,900	Confirmed policy
Family Premium, annual	₩79,000	Confirmed policy
Current Plus	₩9,900 / ₩99,000 (store)	Live
CARE-M	12% of transaction value · borne by provider	Confirmed policy
CARE-P	8% of total booking amount · borne by business	Confirmed policy
Business Premium	₩29,900/month · ₩299,000/year	Confirmed policy
Local recommendation ads	7 days ₩19,900 · 30 days ₩49,900	Confirmed policy
Sponsored search ads	7 days ₩29,900 · 30 days ₩79,900	Confirmed policy
In-app shopping & group buys	Sales fee 7% (proposed · not confirmed)	Planned

Prices and rates are policy confirmed in 2026-11 and apply when Family Premium and business products launch. PG and payout costs are borne by the platform. Vet booking inquiries, adoption and rescue carry a 0% fee.

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

⑧ Payers and billing timing by revenue model

Full revenue model

	Revenue streams	Structure & pricing	Payer	Status	Activation
01	**Family Premium**	₩7,900/month · ₩79,000/year	Guardians	Confirmed policy	After pricing applied
02	**Current Plus**	₩9,900/month · ₩99,000/year	Guardians	On sale	Live
03	**CARE-M personal care**	12% of transaction value	Care providers	Confirmed policy	After CARE-P
04	**CARE-P business booking**	8% of total booking amount	Businesses	Confirmed policy	M11
05	**Business Premium**	₩29,900/month · ₩299,000/year	Businesses	Confirmed policy	M11
06	**Local recommendation ads**	7 days ₩19,900 · 30 days ₩49,900	Businesses	Confirmed policy	After businesses are secured
07	**Sponsored search ads**	7 days ₩29,900 · 30 days ₩79,900	Businesses	Confirmed policy	After businesses are secured
08	**Commerce partnerships**	Partner links · rate not confirmed	Seller	Partly built	Follow-up

⑧ Payers · billing timing · settlement path

Revenue streams	Payer	Billing timing	Payment & settlement path	Refunds & cancellations
Family Premium	Guardians	Store recurring payment	Store → NEWON	Store policy
CARE-M	Care providers	Deducted at settlement after care is completed	PG → payout agency → provider	Dispute procedure (designed)
CARE-P	Businesses	Deducted at settlement after use	PG → payout agency → business	Business cancellation rules
Business Premium	Businesses	Recurring payment	PG	Terms of service
Ads	Businesses	Prepaid before work	PG	Refund of unspent funds
In-app shopping	Seller	On purchase confirmation	PG → settlement → seller	TBD

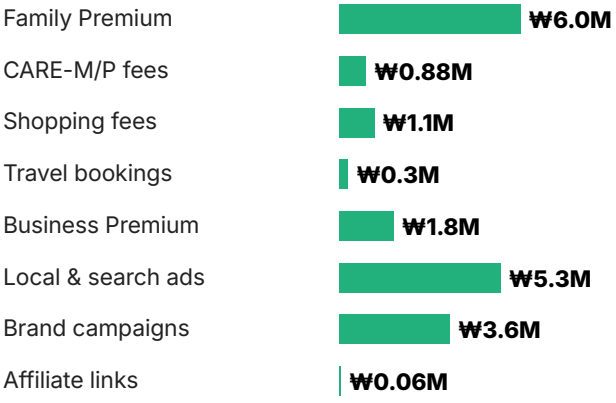

Current revenue	Plus subscription on sale — revenue not yet checked against the store console
In the 18-month model	Family premium · CARE-M/P · in-app shopping & travel partners (proposed) · business premium · ads · ₩19.1M over 18 months (base, assumption)
Excluded from the model	Personal direct second-hand trades · brokerage fees without a contract — not counted as confirmed revenue

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

⑦-2 Ads & business products and 18-month revenue outlook

Revenue streams	Prices & rates	Category	Payer · billing
Family Premium	**₩7,900/month · ₩79,000/year**	Confirmed	Guardian · recurring payment
CARE-M personal care	**12% of transaction value**	Confirmed	Care provider · at settlement after completion
CARE-P business booking	**8% of booking amount**	Confirmed	Business · at settlement after use
Business Premium	**₩29,900/month · ₩299,000/year**	Confirmed	Clinics · grooming · hotels · supplies
Local recommendation ads	**7 days ₩19,900 · 30 days ₩49,900**	Confirmed	Local businesses · prepaid
Sponsored search ads	**7 days ₩29,900 · 30 days ₩79,900**	Confirmed	Local businesses · prepaid
In-app shopping & group buys	Sales fee 7% (not confirmed)	Proposed price	Food & supplies sellers · on purchase confirmation
Pet-friendly stay & travel partner bookings	5% of booking value (not confirmed)	Proposed price	Stay & travel partners
External affiliate links · brand campaigns	5% (assumption) · from ₩2,000,000 per campaign	Proposed price	Retailers · pet food, supplies & insurance brands

18-month revenue — ₩300M base (excl. VAT)

Total ₩19.1M · accelerated scenario ₩51.0M

Expansion into a life platform

Health & daily records → social → care (CARE-M) → business booking (CARE-P) → shopping → pet-friendly travel. As records accumulate, demand for care, bookings and ads grows with them.

Base scenario calculation

Subscriptions: 104 paying at M18 × ₩5,596
CARE: from M11, 1% of actives × ₩50,000 × weighted 9.6%
Business premium: from M11, 2/month · 16 by M18
Ads: from M10, 3 advertisers → +2/month × avg ₩58,880
Shopping: from M5, 1.5% of actives × ₩40,000 × 7% (proposed)

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21). Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑨ Customer acquisition and business sales strategy

Existing users

V2 release notice · new users via social sharing

Store

Store optimization in 12 languages · search ads ₩0.5M/month (₩300M case)

Local business sales

3–5 grooming, hotel and daycare businesses in 1 pilot region · 4–8 weeks · free onboarding

Business monetization

After the pilot: Business Premium · local recommendation & sponsored search ads

Partnerships

Hyundai Home Shopping (product guidance) OI proposal · overseas OI proposals — none signed

Acquisition channels & barriers to entry (summary of business materials)

Initial market	Existing users of the live app · grooming, hotels and daycare in the CARE-P pilot region
Acquisition path	Co-guardian invites · social sharing · direct sales to businesses · search and ads
Barrier to entry	Daily records + business booking history — measured after launch

Next growth goal **Measure actual acquisition cost per channel within 2 months of launch and replace the model's assumption.**

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

⑩ Competition & differentiation · ⑪ Market evidence & outlook

⑩ Main competitors & alternatives

Competitors & alternatives	Structure	Gap · threat
Pet record apps	Record-centered · free & subscription	Combines records + booking + social
Pet-sitter matching apps	Personal care · fees	CARE-M comes later · guardians who already hold record data
Grooming & hotel booking apps	Business booking · ads	CARE-P 8% · Business Premium
Pet social & communities	Content-centered	Record-based profile social

⑪ Market size evidence — size of demand, not number of customers

Market evidence	Sources	Meaning
Pet households 5.91M (29.2% of households)	KB Research 2025 · Ministry of Agriculture 2025	Guardian-based
Monthly cost per pet ₩121K	KB Financial Group Research Institute 2025	The spending already exists

⑪ Key assumptions of the business plan

- Guardians' willingness to pay for family subscription (₩7,900)
- Businesses' willingness to pay an 8% fee
- 1% of MAU make one CARE-P booking per month · average ₩50,000
- Whether social features lift retention
- CARE-M incident and dispute rate

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21). Competitor prices were not compared because official data was not available. Market figures show the size of demand, not PETLOG's customer count.

⑫ Unit economics

Calculated as what one unit (transaction, subscription, booking) leaves after VAT, store, PG and settlement costs.

Item	Amount	Sources
Net revenue of Family Premium at ₩7,900/month	₩6,105	Calculation
Average net revenue (50:50 monthly/annual)	₩5,596	Assumption
CARE-P ₩50,000 at 8% fee	₩4,000	Confirmed rate
VAT	−₩364	Calculation
PG 3.4% × 1.1 (borne by the platform)	−₩1,870	Published rate
Payout agency	−₩300	Assumption
CARE-P contribution margin	₩1,466	Calculation
Net revenue of business premium	₩27,182 − PG	Calculation

Monetization assumptions in the 18-month model

- 300 organic new users/month + ads → 2% of new users pay · ₩5,596 per family per month
- CARE-P from M11 (2027-10): 1% of PETLOG MAU per month · average ₩50,000
- Business Premium grows by 2 businesses a month from M11
- M18: 104 paying families · 28 CARE-P bookings/month

Average booking ₩50,000, conversion and business growth rate are all assumptions; there is no actual booking data.

Next growth goal **Recalculate unit economics with the contracted PG rate and actual average prices.**

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21). Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑬ Security, legal & regulatory review items

Area	Review items	Current	Status
Veterinarians Act	No diagnosis, prescription or care brokering · clinic info is guidance only	Excluded functions	Live
Vet clinic ads	Ads labeled · no inducement to medical visits	Policy	Confirmed policy
CARE-M	Provider identity & qualifications · accident liability & insurance · disputes	Not yet reviewed	Contract/legal required
CARE-P payments	PG · payout agency · business settlement	After PG contract	Contract/legal required
Location data	Walk GPS not built · if built, location-business registration to be reviewed	Not built	Planned
Personal data	Improve co-guardian permissions and isolation security	In progress	In development
Subscription	Deploy server verification · notice of price change	Not deployed	In development

Legal content is a list of review issues, not a legal opinion. External legal review is budgeted for M2 and M8 after investment.

Next growth goal **Disable risky features or revise the terms based on the external legal review.**

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21).

⑭ Monthly development & commercialization schedule · ⑮ KPIs and completion criteria

⑭ 18-month schedule (M1 = 2026-12)

Month	Development & release	Commercialization & customers
M1 · 2026-12	Fix V2 subscription-flow defects	Connect analytics
M2 · 2027-01	Deploy subscription-verification server	D30 baseline
M3 · 2027-02	V2 release (social & navigation)	Family Premium ₩7,900 applied
M4 · 2027-03	Record expansion	Ads ₩0.5M/month
M5 · 2027-04	CARE-P business screens · launch in-app shopping	Sales to pilot businesses · shopping 7% (proposed)
M6 · 2027-05	CARE-P booking flow	3–5 pilot businesses · metrics published
M7~M8	CARE payment integration (after PG contract)	Legal review of CARE and recurring payments (M8)
M9~M10	Business management · no-show policy · launch pet-friendly stay & travel partner bookings	Pilot results review · travel 5% (proposed)
M11~M12	CARE-P full launch · business premium	Business Premium sales start
M13~M15	Ad products · pet-friendly places (planning → development)	More local businesses
M16~M18	CARE-M (after ID and insurance review)	Second region · 104 paying · 28 CARE-P bookings/month (assumption)

⑮ KPIs · completion criteria

KPI	Definition	Decision date	Completion criteria
V2 defects	Open defects	M2	0
D30 retention	V2 before/after comparison	M4	Improved or not
Paid conversion rate	New → Family Premium	M6	vs. 2% (assumption)
Pilot businesses	Onboarded businesses	M6	3–5 businesses
Booking conversion	Bookings ÷ business detail views	M10	Baseline
No-show rate	No-shows ÷ bookings	M10	Baseline
CARE-P monthly bookings	M18	M18	28 bookings (base, assumption)

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21). Schedules and targets are plans and assumptions.

⑯ Key execution tasks and responses · investor questions

Execution tasks	Importance	Response strategy	Warning signal
Care incidents (CARE-M)	Medium · critical	CARE-P first · CARE-M after ID, insurance and dispute review	Legal review opinion
Slow business onboarding	Medium	Focus on pilot region · free onboarding	Fewer than 3 businesses by M6
Being mistaken for violating the Veterinarians Act	Low	No diagnosis or prescription features · wording reviewed	Regulatory inquiry
Social moderation load	Medium	Report & block · automatic filter	Spike in reports
V2 schedule slip	Medium	Narrow scope · keep existing apps stable	Not released by M3

Questions investors ask first

Q. Why does a record app handle bookings?

Guardians who record every day already have the app open. A CARE-P pilot will test the hypothesis that the person who records also books in the app.

Q. What about CARE-M incidents?

Personal care opens only after ID verification, dispute procedures and insurance review are in place. We start with business bookings (CARE-P).

Q. Why would businesses join?

We start with an 8% booking fee and offer Business Premium and local ads to businesses that get bookings.

Q. Veterinarians Act risk?

We provide records and information only — no diagnosis, prescription or care brokering. Vet booking inquiries carry a 0% fee.

Q. Why lower the price?

Lowering the current Plus ₩9,900 to Family Premium ₩7,900 to convert co-guardian families (confirmed, not yet applied).

Q. Overseas?

The app ships in 12 languages, but overseas usage metrics will be shared once analytics are connected. Validation proposals for 9 overseas regions are being drafted.

Sources: PETLOG partnership deck (2026-10-29) · repository audit (10-15~19) · V2 branch & isolated QA on Mac (11-05~08) · store check (10-21). There is no actual conversion or booking data. All targets are assumptions of the 18-month financial model.

ONGIL

paid by seniors

E01 · ① Business definition

ONGIL is a senior living app where older adults record health readings, medication, clinic appointments and daily check-ins themselves in large text and plain language, and send only the information they choose to their family. Essential senior features stay free; the model is for families, care institutions and life services to pay.

① Long-term vision — scope by stage

Now	Development paused (2026-10-19) · focus on SHAREON
Jun 2027 (M7)	Official restart of existing development · full audit of the Mac repositories
Jun–Sep 2027	Extension development, integrated QA & real-device testing → final launch target Oct 2027
Long-term	Institution SaaS · family subscription · Friends · Life Box · Safe Band · jobs, welfare, mobility, housing

User journey

1	2	3	4	5
Show medicines	**Taken check**	**Health readings**	**Today's check-in**	**Summary to family**

Principle

ONGIL does not guarantee medical diagnosis or emergency rescue and does not replace 119 or the public safety net. Sharing is off by default — only items the senior selects are shared.

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR.

② Core customer segments and problems · ③ Usage scenarios

② Problems by customer segment and current alternatives

Customer segment	The real problem	Current alternatives
Seniors (65+)	Apps are hard to use · managing medication and clinic schedules	Paper calendars · pill boxes · phone
Adult children as caregivers (40s–60s)	Check in on wellbeing and medication from afar · share caregiving	Phone · group chats · telecom check-in services
Day-care and home-care providers	Family communication · sharing care records	Phone · text · institution systems
Corporates · insurers · telecoms	Care for employees' parents · older customers	Benefit programs

Problem → NEWON's solution

Apps are hard to use	Large text · plain language · no sign-up
Family far away can only worry	Daily check-in · caregiver summary SMS
Uncertain who to call in an emergency	Emergency contact: 119 · 112 · personal contacts

③ Customer usage scenarios

Morning medication

Large-text "medicines today" → taken check → log blood pressure → send "today's check-in"

Guardian confirmation

Receive a summary text of only the items the senior chose → check clinic schedule → share caregiving (in development)

Emergencies

Emergency button → 119 · 112 · my contact list (not a rescue guarantee)

Next growth goal **Quantify problem size and willingness to pay through customer interviews (plan in Main IR p.4).**

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR.

④ All business areas and features

Health · medication

Health readings — Built
6 readings incl. blood pressure and blood sugar · no assessment

Medication reminders — Built
Medicines to take · taken check

Clinic schedule · calendar — Built
Schedule & to-dos

Symptom · daily records — Built
Entered by seniors themselves

Family connection

Daily check-in — Built
Sent by the senior

Caregiver summary SMS — Built
Only chosen items sent

Family connection server — In development
Remote check · tests PASS, not deployed

Care sharing — In development
Delegated tasks · family schedule

Safety

Emergency contact — Built
119 · 112 · personal contacts

Safe Band — Long-term
Wearable safety-device integration

Anomaly alerts — Long-term
Device & institution integration

Care institutions

Institution SaaS — Planned
Day-care & home-care institution operators

Caregiver communication — Planned
Institution ↔ family

Care record sharing — Planned
Consent-based

Living · social

ONGIL Friends — Planned
Neighborhood friends, hobbies & meetups

Welfare information — Partly built
Subsidy & welfare info

Life Box — Long-term
Recurring delivery of living & health bundles

Mobility · jobs · housing — Long-term
Long-term areas

Assistant · global

ONGIL Helper — Partly built
Rule-based guidance — not AI

Voice AI — Long-term
Record and ask by voice

Institution · overseas pilots — Planned
1–2 institutions · overseas research proposal

Built · Partly built · In development · Planned · Long-term

"Built" = evidence from iOS simulator and automated tests; not verified on real devices; not released. All 28 areas: Live 0 · Built 3 · Partly 5 · In development 4 · Planned 8 · Long-term 8 (ONGIL partnership deck 2026-10-28). The table above shows key features only.

25	**ONGIL Global**	Overseas pilots	Long-term
26	**ONGIL Life Box**	Recurring delivery of living & health bundles	Long-term
27	**ONGIL Friends**	Neighborhood friends, hobbies & meetups	Planned
28	**ONGIL Safe Band**	Wearable safety device	Long-term

Live 0 · Built 3 · Partly built 5 · In development 4 · Planned 8 · Long-term 8. The 28 area names from the previous 119-page IR are kept, with status updated per the 2026-10-28 partnership deck. The focus areas in the brief (Friends · Life Box · Safe Band · institution SaaS) are all at the planning or long-term stage.

Next growth goal **On restart, limit the first release to 5 areas: health records, medication, daily life, family care and senior safety.**

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR.

⑤ Actual development and release status by feature

Released features and in-development or planned items are separated in one table.

Feature	Status	Evidence & limits
6 health readings (no diagnosis)	Built	Simulator & automated tests
Medication reminders · taken check	Built	Simulator
Clinic schedule · to-dos · calendar	Built	Simulator
Symptom · daily records	Built	Simulator
Daily check-in · caregiver summary SMS	Built	Simulator
Emergency contact (119 · 112 · contact list)	Built	Simulator
Large-text UI · accessibility	Built	Automated accessibility 24/24
Family connection server (remote check)	In development	Tests PASS · not deployed
Care sharing · caregiver view	In development	Paused
Welfare information guide	Partly built	Partly
ONGIL Helper (rule-based)	Partly built	Not AI
Institution SaaS · caregiver communication	Planned	Planned
ONGIL Friends	Planned	Planned
Life Box · Safe Band · Voice AI	Long-term	Long-term
Jobs · mobility · housing · market	Long-term	Long-term
Android · real devices	Planned	First task after restart

⑥ Free vs paid · ⑦ Confirmed fees, subscriptions & ad policy

⑥ Free vs paid

Features & products	Free / Paid	Target
Check-ins · emergency contact · basic records	Free by principle (never monetized)	Seniors
Family subscription	₩4,900 · ₩9,900 · ₩14,900 (draft plan)	Guardians
Institution SaaS	Free · ₩39,000 · ₩99,000 · ₩199,000 (proposed)	Institutions
Life Box · Safe Band	Price TBD	Users, families & institutions
What we do not do	Medical practice, long-term care benefits, emergency rescue · misleading ads to seniors	—

⑦ Pricing & fee policy — confirmed · currently on sale · proposed

Policy	Prices & rates	Status
Essential features for seniors	₩0	Confirmed policy
Family subscription	₩4,900 · ₩9,900 · ₩14,900 per month	Planned
Institution SaaS	Monthly: free · ₩39,000 · ₩99,000 · ₩199,000	Planned
Paid PoC · co-development	In talks	Planned
Life-service fees	Rate TBD	Long-term

All prices are proposals or draft plans; none is confirmed (ONGIL partnership deck 2026-10-28). The earlier guardian ₩6,900 and institution ₩99,000 were also proposed prices.

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR.

⑧ Payers and billing timing by revenue model

Full revenue model

	Revenue streams	Structure & pricing	Payer	Status	Activation
01	**Family subscription**	Draft plan ₩4,900 · ₩9,900 · ₩14,900 per month	Guardians	Not final	After restart
02	**Institution SaaS**	Proposed: free · ₩39,000 · ₩99,000 · ₩199,000	Institutions	Not final	After restart
03	**Life-service fees**	Rate not confirmed	Businesses	Not final	Long-term
04	**Paid PoC · co-development**	In talks	Corporate & public sector	Planned	After restart
05	**Life Box**	Recurring delivery · price TBD	Users & families	Long-term	Long-term
06	**Safe Band**	Device integration · price TBD	Users & institutions	Long-term	Long-term
07	**Essential features for seniors**	Check-ins, emergency contact and basic records are free	—	Free by principle	Always

⑧ Payers · billing timing · settlement path

Revenue streams	Payer	Billing timing	Payment & settlement path	Refunds & cancellations
Family subscription	Adult children as guardians	Recurring payment (method TBD)	Store or PG	TBD
Institution SaaS	Institutions	Monthly subscription	Tax invoice	Per contract
Corporate B2B2C	Businesses	Annual contract	Tax invoice	Per contract

Current revenue	None — not launched · no payment feature
In the 18-month model	Family premium, institution SaaS & local ads after the Oct 2027 (M11) launch · ₩4.5M over 18 months (base) · restart cost ₩22M (M7–M10)
Never charged for	Essential senior features · medical acts, long-term care benefits, emergency rescue · ads that may mislead seniors

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR.

⑦-2 Ads & business products and 18-month revenue outlook

Revenue streams	Prices & rates	Category	Payer · billing
Basic safety, emergency & records	₩0	Stays free	Seniors
Individual & family subscriptions	₩4,900 · ₩9,900 · ₩14,900/month (draft plan)	Draft plan	Adult children as guardians · model uses ₩9,900
Advanced AI & family-care subscription	Premium upper-tier products	Proposed price	Guardians
Welfare & care-institution SaaS	Monthly: free · ₩39,000 · ₩99,000 · ₩199,000 (draft plan)	Draft plan	Day-care, home-care & nursing institutions · model uses ₩99,000
Local senior-service recommendation ads	30 days ₩49,900	Proposed price	Local businesses (senior protection standards)
Partner commerce for senior goods & services	Sales commission	Proposed price	Seller
Living, care, mobility & booking brokerage	Fees within legal limits	Long-term	Service businesses
Institutions & local governments B2B/B2G	Annual contract	Long-term	Institutions & local governments
Life Box · Safe Band	Devices & recurring services	Long-term	Users & institutions

18-month revenue — ₩300M base (excl. VAT)

Total ₩4.5M · accelerated scenario ₩9.3M

Restart and launch plan

Jun 2027 (M7) official restart of existing development → extension development & integrated QA Jun–Sep → Oct 2027 (M11) final launch target → institution SaaS & local ads in sequence

Same for all scenarios and the ₩200M option (CEO-set target · subject to passing launch gates)

Principle

- Safety & emergency features are free
- Ads labeled and frequency-capped to avoid confusing or harming seniors
- No medical diagnosis; does not replace 119 or the public safety net
- Prices and rates confirmed through guardian and institution interviews after restart

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR. Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑨ Customer acquisition and business sales strategy

Institution pilot

Free pilot with 1–2 day-care or home-care institutions → families via the institution

Guardians

10 guardian interviews → family subscription price experiment

Corporate · insurance · telecom

Kyobo Life (family care-record usability) · Sejong Networks (text & voice assist) · Douzone Bizon OI proposals — not signed

Public sector

Pilot with local-government care programs (long-term)

Acquisition channels & barriers to entry (summary of business materials)

Initial market	After restart: caregiver interviews · free pilots at 1–2 day-care centers
Acquisition path	Seniors and families onboarded through institutions (B2B2C) · pilot for employees' parents' care
Barrier to entry	UX seniors use themselves and consent-based sharing — not yet validated

Next growth goal **Measure actual acquisition cost per channel within 2 months of launch and replace the model's assumption.**

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR.

⑩ Competition & differentiation · ⑪ Market evidence & outlook

⑩ Main competitors & alternatives

Competitors & alternatives	Structure	Gap · threat
Telecom check-in services	Call & IoT based	Seniors record themselves · share only what they choose
Medication reminder apps	For general users	Senior UI · family connection
Institution operating systems	Focused on institutional workflows	Complements family communication — partner, not competitor
Care robots & devices	Hardware	Safe Band under long-term partner review

⑪ Market size evidence — size of demand, not number of customers

Market evidence	Sources	Meaning
Age 65+ 10.72M (20.7%)	Statistics Korea 2025	User base
Long-term care recipients 1.235M	National Health Insurance Service 2025	Institution & family care demand

⑪ Key assumptions of the business plan

- Seniors' continued direct use
- Adult children's willingness to pay a monthly subscription
- Institutions' willingness to pay for SaaS and price range
- Whether a text summary works better than the app

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR. Care institutions are partners, not competitors. Features not yet built are not presented as differentiators.

⑫ Unit economics

Calculated as what one unit (transaction, subscription, booking) leaves after VAT, store, PG and settlement costs.

Item	Amount	Sources
Institution SaaS proposed price ₩99,000	Net revenue ₩90,000 (excl. VAT)	Proposed-price example
Family subscription ₩9,900 (draft plan)	₩7,650 at 15% store fee	Draft plan example
Text-message cost	Cost per case — to be estimated after restart	Confirmed after restart
18-month model	Family premium, institution SaaS & local ads included after the Oct 2027 (M11) launch · restart cost ₩22M (M7–M10)	Assumption

Monetization assumptions in the 18-month model

- Payers are institutions, companies and guardians — seniors are never charged
- Validated in order: institution pilot → paid institution → family subscription
- Price and bundle to be set after restart through price experiments and partner talks
- ONGIL revenue not included in the 18-month model

Examples are calculated at proposed prices, not targets or results. Payments will connect to the SHAREON payment module after restart.

Next growth goal **Recalculate unit economics with the contracted PG rate and actual average prices.**

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR. Financials: integrated financial model — post-investment business-plan scenario · excluding VAT.

⑬ Security, legal & regulatory review items

Area	Review items	Current	Status
Medical	No diagnosis or assessment wording · health readings are recorded only	Implementation	**Built**
Emergencies	States clearly it does not replace 119 / public safety net	Implementation	**Built**
Seniors' personal data	Not shared by default · per-item consent · access log	Design	**Partly built**
Health data	Sensitive-data consent · privacy policy published	After restart	**Planned**
Institution links	Consent to share information with long-term care institutions	Planned	**Planned**
Device (Safe Band)	Whether it counts as a medical device · location data	Long-term	**Long-term**

Legal content is a list of review issues, not a legal opinion. External legal review is budgeted for M2 and M8 after investment.

Next growth goal **Disable risky features or revise the terms based on the external legal review.**

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR.

⑭ Monthly development & commercialization schedule · ⑮ KPIs and completion criteria

⑭ 18-month schedule (M1 = 2026-12)

Month	Development & release	Commercialization & customers
M1~M6	Keep development paused · preserve documents & code	Expanded launch of SHAREON, BB & PL (Feb–Mar) · stabilization (Mar–May)
M7 · 2027-06	Official restart of existing development · full repository audit	Confirm build scope, unfinished features & technical debt
M8~M9	Finish existing features · family care & connection · institutions & welfare · subscriptions	10 caregiver interviews · 2 candidate institutions
M10 · 2027-09	Admin & operations · security, privacy & accessibility · integrated & real-device QA	Pre-launch QA & security review ₩6M · store review
M11 · 2027-10	Final official launch target (if gates are passed)	Free pilot started with 1 institution
M12~M18	Caregiver screens · shared care duties · introduce booking, brokerage & partner stages	Institution SaaS & local ads · pricing experiments

⑮ KPIs · completion criteria

KPI	Definition	Decision date	Completion criteria
Restart readiness	Repository audit · list of unfinished features	M7	Done
Real-device usability	Senior task success rate	M10	Baseline
Launch gates	Quality, security, legal, contracts & store review	M11	All passed
Weekly hands-on use	Share of seniors logging 3+ times a week	M14	Baseline
Institution pilots · willingness to pay	Number of pilot institutions · caregiver & institution interviews	M18	1–2 · price range

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR. Schedules and targets are plans and assumptions.

⑯ Key execution tasks and responses · investor questions

Execution tasks	Importance	Response strategy	Warning signal
Mistaken for medical or emergency service	Medium · critical	Wording excluded · stated not to replace 119	User inquiries
Usability for older adults	High	Large text · start without sign-up · real-device tests	Task failure rate
Spread of resources	High	Restart in June after stabilizing three businesses (Mar–May) · areas dependent on outside parties are checked separately for October launch readiness	Stabilization metrics below target
No clear payer	Medium	Order: institution pilot → paid institution → family subscription	Interview results

Questions investors ask first

Q. Why was it paused?

A one-person team could not launch four businesses at once, so SHAREON's payment launch took priority. The code and test records are preserved.

Q. When will it restart?

We officially restart existing development in June 2027 (M7), run extension development and integrated QA from June to September, and target a final launch in October 2027 (M11). Restart cost is ₩22M (₩16M development + ₩6M pre-launch QA & security); the ₩200M option follows the same schedule.

Q. Who pays?

Free for seniors. Institution SaaS and family subscriptions are the main revenue; prices will be set by experiment after restart.

Q. Is it a medical service?

No. Health readings are only recorded, not assessed, and emergency rescue is not guaranteed.

Q. Can seniors really use it?

It passed the simulator basic flow 6/6 and automated accessibility 24/24, but has not yet been validated with real users or devices.

Q. What about institution partnerships?

OI materials for Kyobo Life, Sejong Networks and Beijing Geriatric Hospital have been applied for and submitted (CEO-confirmed). Whether a meeting is confirmed with each organization is still being checked; no partnership has been concluded.

Sources: ONGIL partnership deck (2026-10-28) · repository dev docs (S11·R2·O4) · last commit (10-19) · 28 areas from the previous IR. ONGIL is mobile-first; the web service is outside the IR scope.

Technical architecture — shared structure and current status of the four apps

Tier	Composition	SHAREON	BABYLOG	PETLOG	ONGIL
App	Flutter · iOS·Android	Development build	App Store 1.0.7 live	Live · V2	Simulator
Authentication	Firebase Auth · Apple & social login	Development	Operations	Operations	Start without sign-up
DB · storage	Firestore · Storage	Development (not connected to production)	Device first + shared items on server	Operations	Local
Server logic	Cloud Functions	Refund, settlement & booking contracts	Family sharing rules (not deployed)	Subscription verification (mock)	Family connection (not deployed)
Payments	Store subscription · PG	PG (OFF)	Store subscription	Store subscription · PG (CARE planned)	None
Subscription status	Newon+ lookup server	—	Use	Use	—
Ads	AdMob	None	Free users	Free users	None
AI	On-device rules · minimal external AI	—	Summary report	Rule-based reports	Rule-based assistant
Admin	Web & API	Review, reports, disputes and settlement hold partly built	Moderation	Report & block	—

Security principles

- Photo GPS metadata removed · exact location hidden (neighborhood level)
- Health and child records stored on device first; only shared items on server
- Append-only audit log (SHAREON) · admin action log
- Payment and settlement features stay unreleased until they pass the external security review (M3, before the SHAREON launch decision)
- Signing keys and production accounts are managed by the CEO alone → access control formalized at incorporation

Sources: technical stack of each repository (2026-10-16~11-08). Production servers, PG and payout-agency accounts are not connected to SHAREON.

Founder workload — shifting the CEO's time to sales and direction

Work	Current weekly share (CEO estimate)	CEO's share after investment	Handed to
SHAREON development	35%	15%	Developer (M5)
BABYLOG · PETLOG development and QA	30%	10%	Developer · external QA
ONGIL	0% (paused)	0~5%	Outsourced on restart
Operations, CS & moderation	10%	5%	Operations & CS (M4)
Sales, partnerships & supplier acquisition	10%	35%	CEO directly
Investment, finance & incorporation	10%	15%	Bookkeeping · legal advisory
Design & planning	5%	15%	CEO directly

Shares are the CEO's own estimate with no time-tracking evidence. After investment, weekly work logs will be kept and included in quarterly reports.

Operating rules for one founder, four businesses

- No new feature launches in other apps before SHAREON launches
- Build common modules (payments, settlement, subscriptions, consent) once
- Conditional costs (marketing expansion, CARE-M) are spent only after prerequisites are met · ONGIL spending follows the June 2027 restart schedule
- Businesses missing milestones two quarters in a row get fewer resources

Work shares: CEO estimate (2026-11). Evidence grade "assumption".

Hiring & outsourcing plan — the team grows as revenue grows

Role	₩300M base plan	₩200M alternative	Scope of work	Selection criteria
1 operations & CS staff	M4 · ₩3M/month	M6 · ₩3M/month	SHAREON supplier support, disputes, CS and moderation	Marketplace CS experience
1 developer	M5 · ₩4.5M/month	Replaced by outsourcing	Payments & settlement · PETLOG CARE · ad platform · ONGIL	Flutter · Firebase · payment integration experience
1 ads & partnerships salesperson	₩3.5M/month · when prior month's ad revenue is ₩2M or more	₩3M/month · when ₩2.5M or more	Sell ad products · business suppliers & brand partnerships	Ads & platform sales experience
Payments & settlement outsourcing	—	M3 · ₩15M	SHAREON payment & settlement scope	PG integration track record
External QA	M3 · ₩8M	M3 · ₩6M	iOS & Android real devices · payment scenarios	Holds a pool of real devices
External security review	M3 · ₩10M	M4 · ₩6M	Payments & privacy · server rules	Mobile & cloud check track record
ONGIL extension development	M7–M10 · ₩4M/month + pre-launch QA & security ₩6M	Same	Existing code audit · extension development · real-device QA · store launch	Flutter outsourcing

₩169M

₩300M people cost, 18 months

CEO · operations · development · ad sales

₩87.0M

₩200M people cost, 18 months

₩15.0M

₩200M: outsourced payments/settlement

Replaces hiring

Financials: integrated financial model — post-investment business-plan scenario · excluding VAT. Salaries are estimates including the four social insurances.

Incorporation plan — carried out together with the investment agreement

Stage	Details	Timing	Notes
1. Advisory	Corporate form, articles and shareholder structure · consistency with the investment agreement structure	M1	Legal & tax advisory
2. Incorporation	Register a stock corporation · corporate bank account	M1	Advisory & registration ₩2M (estimate)
3. Asset transfer	Apps · source code · domains · trademarks · store accounts · server accounts · signing keys	M1~M2	Store account transfer review schedule reflected
4. Contracting entity	PG merchant · ID verification · payout agency · cloud	M2~M3	SHAREON launch preparation
5. Close sole proprietorship	Clean up existing revenue & tax records	M3	Tax advisory

Work done alongside incorporation

- PG merchant and payout-agency contracts (SHAREON, PETLOG CARE)
- ID verification service contract
- Investment agreement · share issuance
- Hiring · social insurance

Incorporation schedule and cost will be set after advisory.

Investment terms — ₩300M preferred, ₩200M negotiable

Item	NEWON proposal	Status
Investment amount	₩300M preferred · ₩200M negotiable	Request
Investment structure	Negotiable (common, preferred, SAFE, etc.)	Under discussion
Valuation · equity stake	In talks	Under discussion
Incorporation	Done in M1 in line with the investment agreement	Plan
Report	Monthly spending report · quarterly growth-target report	Proposal
Fund management	Corporate account managed separately	Proposal

Valuation and equity stake are subject to negotiation.

Financial assumptions — unit prices and scenarios

Common inputs

Inputs	Value	Sources
VAT · PG · refunds	10% · 3.4% · 3%	Tax law · published standard rates · assumptions
Store fee	15%	Small Business Program
SHAREON transaction mix	Base C2C 66 · B2C 28 · C2B 2 · B2B 4% · accelerated 60 · 32 · 2 · 6 · high-growth 55 · 35 · 2 · 8	Business plan
Average transaction value	₩25,000 · ₩60,000 · ₩40,000 · ₩300,000	Business plan
PETLOG CARE	Average ₩50,000 · CARE-M 40% / CARE-P 60% · weighted 9.6%	Confirmed rates · bundle plan
Average monthly spend per PETLOG advertiser	₩58,880 (local 30 days 50% · search 30 days 30% · 7-day twice a month 20%)	Confirmed unit price
SHAREON ads	Search ₩99,000 · recommended ₩59,000 · promotion ₩199,000 · campaign ₩2,000,000	Proposed price
BABYLOG	Ads ₩100,000 · institution SaaS ₩99,000	Proposed price
ONGIL	Family ₩9,900 · institution ₩99,000 (mid tier of draft plan) · ads ₩49,900 (proposed price)	Draft plan & proposed price
BABYLOG in-app shopping	Market & group buys 8% · expert second-hand 7% (weighted 7.9%) · order ₩35,000	Confirmed policy · order value assumed
PL shopping & travel · BB booking · affiliate links	PL shopping 7% · travel 5% · BB experiences 9% (proposed) · links 5%	Proposed assumption · not confirmed
Ad operations variable cost	10% of ad revenue	Estimate

Scenario inputs (₩300M case · ₩200M: launch +1 month · growth ×0.85 · CARE & institutions +3 months · ads +2 months · same ONGIL schedule)

Scenario inputs	Base	Accelerated	High-growth target
Transactions in launch month	50	120	300

Month-end cash (₩300M)

Financials: integrated financial model — post-investment business-plan scenario · excluding VAT. Cash lasts 18 months in every scenario (including zero revenue). The high-growth target is back-solved to ₩100M monthly revenue at M18; if revenue reaches only 70% of plan, about ₩188M of additional funding is needed by M18. Follow-on fundraising starts in M12.

Customer validation plan — collected systematically from launch

What to validate	Method	Scale	Timing	Decision
SHAREON supplier intent	Interviews with rental companies and space operators · pre-onboarding	10 interviews · onboarding target per category	M1~M3	Pre-onboarded count
SHAREON usage intent	Search-ad clicks and request conversion in launch regions	3 months after launch	M4~M6	Request → completion rate
BABYLOG family value	User interviews · invite rate	10 users · all users	M1~M3	Invite rate · D30
BB willingness to pay	Conversion after pricing revision	All released apps	M3~M6	Conversion rate
PETLOG social · subscription	Retention before/after V2	All users	M3~M6	D30 change
PETLOG CARE-P	1 pilot region	3–5 businesses · 4–8 weeks	M5~M10	Booking conversion · no-shows · businesses' intent to reuse
ONGIL	Guardian & institution interviews	10 guardians · 2 institutions	M6~M12	Willingness to pay · pilot agreement

Reactions on Threads and other social media, and store reviews, were not systematically collected, so they are not used as evidence. Within 30 days of investment we will start logging and classifying reviews and inquiries.

Evidence grade: plan. Interviewees and schedule not yet set.

SHAREON partnerships, onboarding & infrastructure — stage and open issues by company

Only confirmed stages are listed. Replies and expressions of interest are not contracts, confirmed onboarding or secured supply. Signed contracts, onboardings and integrations: 0.

Businesses	Purpose of collaboration	Confirmed stage	Check date	Sources	Terms · open issues
ONENEX	Onboard corporate IT-equipment rental companies (B2C suppliers)	Proposal → reply	CEO-confirmed	CEO-confirmed	Replies commented on customer traffic scale, transaction continuity and fee consistency. Free pilot terms and any fee disagreement are as confirmed by the CEO
Studio EIM	Onboard filming & space suppliers	Proposal → reply	CEO-confirmed	CEO-confirmed	Positive reply & materials requested — materials being sent
Toss Payments	PG card payment	Inquiry / in talks	CEO-confirmed (email record of 11-07)	CEO-confirmed · test-key adapter code	Merchant contract after incorporation · contract rate TBD (model uses published rate 3.4%)
PortOne	PG integration agency	Reply	CEO-confirmed	CEO-confirmed	Terms and rates under negotiation
KCB	ID verification	Contract review (before signing)	Form drafted 2026-11-02	Mac evidence (S26 vendors CONTRACT_DRAFT)	Requires seal and contract in the company's name · unit price under negotiation
NICE · KMC	ID verification (alternative)	Inquiry	CEO-confirmed	CEO-confirmed	0 quotes
COOCON	Settlement & account verification	Quote reply	CEO-confirmed	CEO-confirmed · no quote file	Quote needed (model assumption: settlement ₩150 per transaction)
Danal	ID verification & payment validation (COMEUP OI)	OI applied · meetings confirmed*	COMEUP 2026 Dec 9–11 · CEO-confirmed Nov 13	Prepared on Mac · revision REV1112	Limits on C2C payment/payout support — to confirm at the first meeting

What changed in the policy

Item	Partner guide (Oct 31)	Confirmed policy (Nov 3 · Nov 6)	Action needed
Early-company preferential rate	5% for 3 months from the first paid transaction or up to ₩10M GMV	No preferential rate (removed from IR and appendix)	Notify companies that received the guide of the change · check link to ONENEX's "fee consistency" comment
PG fee	Separate (not waived)	Included in the platform fee (borne by SHAREON)	Re-notify in writing with new terms
Free pilot cooperation	Based on what the CEO confirmed in the guide and emails	No external use of SaaS pricing or trial commitments (S26 B13·B14)	Terms confirmed after checking the original

Next growth goal **Submit the partners' original reply emails and send records in due diligence, and confirm terms (fee, trial period, supply volume) in writing.**

10 domestic OI targets (COMEUP 2026) — application & submission done · meetings confirmed

25 OI sets (10 domestic, 15 overseas) prepared → application & materials submitted → meetings confirmed (CEO-confirmed). A confirmed meeting is not a PoC or partnership; PoCs and contracts: 0. Separate from SHAREON's onboarding and infrastructure talks in G02.

25	Done*	Confirmed*	0	0	0	0	0
1. Prepare materials	2. Submit application	3. Confirm meetings	4. Meeting held	5. Follow-up talks	6. PoC agreed	7. Contract signed	8. Operations & results

Domestic OI targets (by priority)

Businesses	App	Priority PoC (proposed)	Stage	Priority
NHN Cloud	SHAREON (+expansion: BB · PL · OG)	Build and verify SHAREON transaction backend on staging (test data only)	Applied & submitted*	P1
Hyundai Home Shopping	BABYLOG · PETLOG	In-app step-by-step guide screens (new for the PoC) → measure clicks through to channel	Applied & submitted*	P1
Danal	SHAREON	Validate rental scenarios in a test environment (no real payments)	Applied & submitted*	P1
Douzone Bizon	SHAREON (ONGIL optional)	In-house rental pilot with 1 company and 1 use case, no system integration	Applied & submitted*	P2
Hyundai E&C	SHAREON	1 apartment complex · run by management body · free rentals	Applied & submitted*	P2
LG Science Park	SHAREON (expansion: BB · PL · OG)	SHAREON prototype for automatic classification and search of rental items — before/after comparison	Applied & submitted*	P2
Mercedes-Benz Korea	SHAREON	1–2 partner rental companies · 1–2 destinations · standalone app	Applied & submitted*	P3
Kyobo Life	ONGIL	Small usability pilot with interested customer families — participants apply directly	Applied & submitted*	P3
Sejong Networks	ONGIL	Compare confirmation rate by delivery channel for small families	Applied & submitted*	P3
Beijing Geriatric Hospital	ONGIL	Expert review + evaluation of Chinese screen mockups with dummy data	Applied & submitted*	P3

COMEUP 2026: Dec 9–11, Seoul.

15 overseas OI regions — at the applied / meeting-confirmed stage (no partnership concluded)

Region	App	Core of the proposal	Type	Priority
Australia (Branch 2)	PETLOG · SHAREON	Interviews on PETLOG usability among English-speaking pet households + SHAREON equipment rental demand	Market validation	P2
Japan · Osaka	BABYLOG · PETLOG	Japanese localization + measure clicks on baby & pet commerce partner info	Business development	P2
India · Delhi	BABYLOG · PETLOG	Price & usability validation + scalability & security check	Market validation	P3
Thailand · Bangkok	PETLOG · ONGIL	PETLOG booking intent of pet households and service providers + ONGIL interviews	Market validation	P3
US · Atlanta	SHAREON · ONGIL	Interviews on business equipment & space rental (B2B) demand + community guardian interviews	Business development	P3
US · Chicago	BABYLOG · PETLOG	US family and pet-household demand + clicks on product partnership info (IoT: spec review only)	Business development	P3
US · New Jersey	SHAREON · ONGIL	Local rental businesses & household demand + US entry strategy	Market validation	P3
Vietnam · Ho Chi Minh City	BABYLOG · SHAREON	BABYLOG Vietnamese localization usability + SHAREON rental demand survey	Market validation	P3
Brazil · São Paulo	PETLOG · SHAREON	PETLOG Portuguese localization usability + SHAREON rental demand interviews	Market validation	P3
France · Paris	PETLOG · SHAREON	PETLOG B2B channel with pet companies + circular-economy rental model	Business development	P3
UK · London	PETLOG · ONGIL	PETLOG UK users and distribution partners + ONGIL fit study	Investor network	P3
US · San Francisco	SHAREON · PETLOG	Joint validation of SHAREON natural-language search prototype + US entry and investor network	Technology	P3
Canada · Toronto	ONGIL · SHAREON	Interviews on long-distance family caregiving + SHAREON interviews, links to startup and investor networks	Investor network	P3
US · Boston	ONGIL	Joint research on senior accessibility and caregiver collaboration usability	Institutions	P3
France · Paris & Nantes	ONGIL · SHAREON	New prototype linking check-in events to guardian alerts	Technology	P3

There are no overseas users, revenue or contracts. Overseas OI is about learning market conditions for expansion after the domestic launch; real transactions, payments and actual care services are out of scope for every proposal. ONGIL targets a June 2027 restart and October launch; OI covers interviews and screen mock-ups only.

Source: 15 English global OI proposals (v5, 2026-11-06) · PoC outline Global 15 · application and meeting confirmation CEO-confirmed (2026-11-13). Overseas organizations are listed by region only and will be confirmed at the meetings.

Domestic OI detail by target — app · proposal · validation · stage · commercialization · risks · follow-up

Target	App · proposal	Validation method (proposed)	Stage	Commercial potential	Risk	Follow-up actions
NHN Cloud P1	SHAREON (+expansion: BB · PL · OG) Joint technical validation of backend infrastructure, security and scalability for 4 apps	One staging environment · load, failover, security check, cost comparison · migration decided after results	Applied & submitted · meetings confirmed*	Staging results decide migration scope (none, partial, expanded) → production contract after cost comparison	Mistaken for a full migration · cost of running two infrastructures · credential exposure	Dec 9–11 meeting: request startup-program/credit terms and a technical contact
Hyundai Home Shopping P1	BABYLOG · PETLOG Life-stage product and content guides → link to Hyundai Home Shopping channel	One guidance area · click-through rate measured first · purchase conversion only if Hyundai Home Shopping provides aggregates	Applied & submitted · meetings confirmed*	Negotiate partner fees and joint promotions based on clicks and traffic	Conversion data is assumed · consent and labeling duties for promotional notices · store policy · degraded user experience	Check whether a measurement method (tracking links, shared aggregates) can be agreed
Danal P1	SHAREON Technical validation of ID verification, payment, settlement and refunds for rentals in a test environment	ID verification → payment, cancellation, partial refund → cancellation after payout · scope decided after confirming C2C support in step 1	Applied & submitted · meetings confirmed*	Apply some ID verification and payments at launch → usage and fee contracts (terms under negotiation)	Limits on C2C payment/payout support (CEO-confirmed) · role overlaps with other PG talks · deposit holding undecided until legal review	First question at the meeting: scope of C2C payment & payout support · check the original of the previous review
Douzone Bizon P2	SHAREON (ONGIL optional) In-house equipment/space sharing at one company (no payments)	1 company · 1 use case (equipment or space) · employee family care (ONGIL) out of scope	Applied & submitted · meetings confirmed*	Corporate subscription or co-sale with client companies (price TBD)	Mixes use of company assets with employee life support · overexpectation of integration · delays in recruiting pilot companies	Check whether pilot companies can be introduced · terms of public API and partner program
Hyundai E&C P2	SHAREON Free shared-equipment lending at one housing complex, run by its management	1 housing complex · 10–20 shared items · complements, not replaces, the existing resident app/booking system	Applied & submitted · meetings confirmed*	Complex-operated subscription & partner-business fees (after launch, price TBD)	Approval from management body and residents' council · overlaps with existing resident apps · operating burden falls on one person	Check candidate complexes, existing resident apps and whether integration is needed

Every item is a proposal; schedules, costs and KPIs are not yet agreed. * Application, submission and meeting confirmation are CEO-confirmed.

Domestic OI detail by target (p.2–3)

Target	App · proposal	Validation method (proposed)	Stage	Commercial potential	Risk	Follow-up actions
LG Science Park P2	SHAREON (expansion: BB · PL · OG) Before/after PoC applying AI to one real feature	One feature (item classification & search) · test data only · expansion to other apps after results	Applied & submitted · meetings confirmed*	If effective, applied to SHAREON listing and search → better transaction conversion	Overstating "AI in every app" · tech terms of use & data export · no training on personal records	Check applicable technology and terms of use, and whether an evaluation dataset can be agreed
Mercedes-Benz Korea P3	SHAREON Standalone mobile PoC for booking/renting leisure gear at the destination for car customers	No vehicle systems or vehicle data used · intent (pre-registration) kept separate from actual rentals	Applied & submitted · meetings confirmed*	Business rental fee (B2C 8% policy) · customer-program partnership (terms TBD)	Brand-use approval · recruit rental companies · real payments after SHAREON launch	Connect with the department running customer programs · confirm brand-use terms only
Kyobo Life P3	ONGIL Usability pilot of non-medical daily-care records and information sharing for older customers and families	No real customer data or lists received · no insurance underwriting data used · no medical diagnosis	Applied & submitted · meetings confirmed*	ONGIL institution B2B2C fee after restart (price TBD)	ONGIL on hold — no pilot before restart · mistaken for health information · mistaken for an insurance link	At meetings, explain the restart conditions and timing first; obtain only the relevant department's contact
